Innovative Listening device for Hearing impaired persons won 1st Prize of Rs. 1 Lakh-TechnoXian at Delhi 27-30th April 2017

Agenda No. 5 Digital & Making Campus cashless Imitative

- The University has a common smart class room consisting of 250 number of LAN connected computers with a master control for providing subject-wise input to the students who have opted for MOOC courses through SWAYAM.
- A series of 120 video lectures have been prepared related to Electrical Power and Energy.
- We are now the registered members of the National Digital Library (NDL) running by IIT Kharagpur.

- The Digital Learning Monitoring Cell, chaired by Vice Chancellor, has been constituted by the University for the regular monitoring of these initiatives.
- As Ministry of Human Recourse Development Instruction dated 05th December 2016 to all the University & Higher Education Institute for participation in go cashless go digital program. The instruction was issued by MHRD indicating date wise Action points & also directed to upload day by day progress for Digital Monitoring System (DMS). The University has taken following steps to compliance the instruction of MHRD
- Organized Seminar of faculty & students on 03-01-2017
- Registered 90 students Volunteers in DMS prepared. Poster pamphlets to educate villages
- Touring villages & educating them for Go-Cashless Go-Digital

(B) Introduction of Fifth Dean Committee on Students Ready Programme

Student READY programme was launched by the Hon'ble Prime Minister of India on 25th July, 2015

Introduction

The term READY refers to "Rural Entrepreneurship Awareness Development Yojana".

To reorient graduates of Agriculture and allied subjects for ensuring and assuring employability and develop entrepreneurs for emerging knowledge intensive agriculture, the component envisages the introduction of the program in all the Agricultural Universities as an essential prerequisite for the award of degree to ensure hands on experience and practical training.

Component of the programme : It is proposed to include following components in Student

READY program.

i. Experiential Learning/Hands on	-24 weeks
ii. Skill Development Training	- 24 weeks
iii. Rural Agriculture Work Experience	-10 weeks
iv. In Plant Training/ Industrial	-10 weeks
v. Students Projects	- 10 weeks

In some disciplines where some components, say, Experiential Learning is not possible at graduate level, the students will be given Hands on Training and/or Skill Development Training, but it should be (out of these 5 components) implemented for the complete year.

All the above mentioned components are interactive and are conceptualized for building skills in project development and execution, decision-making, individual and team coordination, approach to problem solving, accounting, quality control, marketing and resolving conflicts, etc. with end to end approach.

- Experiential Learning helps the student to develop competence, capability, capacity building, acquiring skills, expertise, and confidence to start their own enterprise and turn job creators instead of job seekers. This is step forward for earning while learning concept. Experiential Learning is major step forward for High Quality Professional Competence, Practical Work Experience in Real Life Situation to Graduates, Production Oriented Courses, Production to Consumption Project working, Facilitates producing Job Providers rather than Job Seekers and Entrepreneurial Orientation.
- Rural Agriculture Work Experience also enable the students to gain rural experience giving them confidence and enhancing on farm problem solving abilities in real life situations especially in contact with farmers, growers etc.
- In-plant training for a short period of time in relevant industry to gain the knowledge and experience of the work culture. In Plant training by reputed organization either MNC's or organised sectors provide an industrial exposure to the students as well as to develop their career in the high tech industrial requirements.
- Skill development component include use of Agriculture Systems & devices for enhancing functional skill. It is expected that basic infrastructure

and Experiential Learning Unit available university may help in boosting livelihood ensuring opportunity.

- Student Project is essential for students interested in higher education. Through this component, they will know how to identify research problem, experimental set up and writing report etc.

For the discipline of Agricultural engineering there will 20 weeks in-plant training in place of RAWE.

All the components as per suitability of course i.e. Experiential Learning, Skill Development Training, Rural Agriculture Work Experience (RAWE), Internship/in-plant training and Student Projects are included in the final year of study for 2 semesters to provide entrepreneurial skills, confidence and hands on experience. There are 20 credits for Experiential Learning/Skill Development Training (24 weeks), 10 credits for RAWE (10 weeks programme) and 10 Credits for Industry Attachment/Student Project (10 weeks attachment to industry).

AGRICULTURE

Semester VII

Rural Agricultural Work Experience (RAWE) and Agro-Industrial Attachment (AIA) This program will be undertaken by the students during the seventh semester for a total duration of 20 weeks with a weightage of 0+20 credit hours in two parts namely RAWE and AIA. It will consist of general orientation and on campus training by different faculties followed by village attachment/unit attachment in University/ College/ KVK or a research station. The students would be attached with the agro-industries to get an experience of the industrial environment and working. Due weightage in terms of credit hours will be given depending upon the duration of stay of students in villages/agro-industries. At the end of RAWE/AIA, the students will be given one week for project report preparation, presentation and evaluation.

The students would be required to record their observations in field and agro-industries on daily basis and will prepare their project report based on these observations

Semester VIII

Experiential Learning Programme (ELP)/ Hands On Training (HOT)

This program will be undertaken by the students preferably during the eighth semester for a total duration of 24 weeks with a weightage of 0+20 Credit Hours. The students will register for any of two modules, listed below, of 0+10 credit hours each.

- Production Technology Bio-agents and Bio-fertilize
- Seed Production and Technology
- Mushroom Cultivation Technology
- Soil, plant, water and seed Testing
- Poultry Production Technology
- Hybrid Seed Production Technologies
- Floriculture and Landscaping
- Food Processing
- Commercial Horticulture
- Agriculture Waste Management
- Organic Production Technology
- Commercial Sericulture

In addition to these ELP modules other important modules may be given to the students by SAUs.

Indian Council of Agricultural Research has already provided financial help for establishment of two or more Experiential Learning units in different State Agricultural Universities, hence, each university is expected to plan EL program accordingly.

AGRICULTURE ENGINEERING

Student READY program of the Agricultural Engineering is proposed to have the following components:

1. Student READY Skill Development Training -I for five weeks in the summer break after IV semester with a credit load of 0+5 credit hours.
2. Student READY Skill Development Training -II for five weeks in the summer break after VI semester with a credit load of 0+5 credit hours.
3. Industrial attachment of 10 weeks in VII semester with a credit load of 0+10 credit hours.
4. On campus Experiential Learning Program of 12 weeks in VII semester with a credit load of 0+10 credit hours.
5. Project Planning and Report Writing of 12 weeks during VII semester with a weightage of 0+10 credit hours.
