

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering) SECOND YEAR-Semester-III Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	ENVIRONMENTAL ENGINEERING	ME-3011	4L-0T-0P	4

Course Outcomes: After studying this course, students will be able to,

- CO1- Convey a clear idea of the interdisciplinary nature of environmental and health risk assessment.
- CO2- The ability to apply the fundamental knowledge of science and engineering to assess environmental and health risk.
- CO3- Ability to understand environmental laws and regulations to develop guidelines, procedures and processes for health and safety issues.
- CO4- Understand what are professional ethics and how do ethics affect the outcomes of environmental laws and regulations.

UNIT-I

Ecosystem –Principles of ecology, ecosystem concept: Biotic and biotic components of ecosystem, Segments of Environment: Atmosphere, hydrosphere, Lithosphere, biosphere. Biodiversity: Threats and conservation, Food Chain.

UNIT-II

Energy General idea about-

Natural Resources, current status and types of resources NonRenewable Sources of energy, coal, oil, Gas, Hydrogen, nuclear sources.

UNIT-III

Air Pollution & Sound Pollution - Air Pollution: Air pollutants, classification, (Primary & secondary Pollutants) Adverse effects of pollutants. Causes of Air pollution Environmental problems, (Global warming, ozone depletion and acid rain) General idea about forest ecosystem, grassland ecosystem, wetland ecosystems and aquatic Biogeochemical Cycling: Oxygen cycle, Carbon cycle, Nitrogen cycle, Sculpture cycle and water cycle.

UNIT-VI

Water Pollution-Pollutants in water, adverse effects. Treatment of Domestic & Industrial water effluent.
Soil Pollution – Soil Profile, Pollutants in soil, their adverse effects, controlling measures.

UNIT-V

Society & Ethics – Impact of waste on society. Solid waste management (Nuclear, Thermal, Plastic, medical, Agriculture, domestic and e-waste). Ethics and moral values, ethical situations, water preservation rain water collection. Environmental Impact Assessment.

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering) SECOND YEAR-Semester-III Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	STRENGTH OF MATERIALS	ME-3021	3L-1T-2P	6

Course Outcomes: After studying this course, students will be able to,

CO1-Students will be able to predict mechanical behavior of the member by determining the stresses, strains and deflections produced by the loads up to the elastic limit.

CO2- Students will be able to solve the stresses in determinate and indeterminate, homogeneous and composite bars under concentrated loads, self weight and thermal loads.

CO3- Students will be proficient to construct Shear Force and Bending Moment diagrams for statically determinate beam due to concentrated load, uniformly distributed load, uniformly varying load and couple.

CO4-Students will be able to determine bending and shear stresses in machine elements.

UNIT - I

STRESS AND STRAIN: Definition, Stress- strain, tensile & compressive stresses, shear stress- Elastic limit, Hooke's Law Poisson's Ratio, modulus of elasticity, modulus of rigidity, bulk modulus, yield stress, ultimate stress, factor of safety, state of simple shear, relation between elastic constants, Volumetric Strain, Volumetric strain for tri-axial loading, Deformation of tapering members, Deformation due to self weight, bars of varying sections, composite sections, temperature. Stress Mechanical properties of materials: Ductility, malleability, hardness, toughness, fatigue, creep; behavior of materials under tension, compression, bending, shear; ductile and brittle materials, failure of MS and CI in tension and torsion

UNIT - II

COMPOUND STRESSES: introduction, 3.2 Stress components on inclined planes, 3.3 General two- dimensional stress system, 3.4 Principal planes and stresses, 3.5 Mohr's circle of stresses. 3.6 Thin cylinders subjected to pressure, change in length, diameter and volume, 3.7 Thick cylinders - Lamé's equations (excluding compound cylinders).

UNIT - III

STRESSES IN BEAMS: Theory of pure Bending, Assumptions, Flexural formula for straight beams, moment of resistance, bending stress distribution, Section moduli for different sections, beams for uniform strength, Flitched beams, Principle axes, Principle moment of inertia Direct & Bending Stresses: Core of Section, Chimneys subjected to wind pressure SHEAR STRESS IN BEAMS: Distribution of shear stress, across plane sections used commonly for structural purposes, shear connectors

UNIT - IV

BENDING : pure bending, symmetric member, deformation and stress, bending of composite sections, eccentric axial loading, shear force and BM diagram, relationship among load, shear and BM, shear stresses in beams, strain energy in bending, deflection of beams, equation of elastic curve, Macaulay's method and Area moment method for deflection of beams.

UNIT -V

TORSION: Torsion of circular shafts- solid and hollow, stresses in shaft when transmitting power, shafts in series and parallel. Torsion in shafts: stresses in a shaft, deformation in circular shaft, angle of twist, stepped-hollow, thin walled-hollow transmission shafts Leaf springs; helical springs, open and closed coil, stress in spring wire, deflection of helical spring, springs in series and parallel.

2. G.H.Ruder; Strength of Material; ELBS with Macmillan third edition.
3. B.K.Sarkar, Strength of Material ; Tata McGraw hill New Delhi.
4. Dr. R. K.Bansal; A Text Book strength of Material; Laxmi Publication New Delhi.
5. S Ramamrutham, Strength of Material; Dhanpat Rai & Publication New Delhi.
6. R.S.Khurmi; Strength of Material; S.Chand Company Ltd. Delhi

Suggested List of Laboratory Experiments (Expandable):-

1. Study and demonstration of Universal Testing Machine & its attachments.
2. Drawing sheet on shear force & bending Moment diagrams for a given loading (At least four problems.).
3. Tension Test on mild steel, Aluminum & compression test on cast iron on UTM.
4. Direct Shear Test of mild steel on Universal Testing Machine.
5. Brinell Hardness Test on Mild Steel.
6. Rockwell hardness Test on Hardened Steel.
7. Izod & Charpy - Impact tests of a standard specimen.
8. Torsion Test on Mild steel bar.

B.E. (Mechanical Engineering)
SECOND YEAR-Semester-III
Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	MANUFACTURING PROCESSES	ME-3031	3L-1T-0P	4

Course Outcomes:After studying this course, students will be able to,

CO1-Select appropriate Manufacturing Processing to manufacture any component.

CO2-Interpret foundry practices like pattern making, mold making, Core making and Inspection of defects.

CO3-Differentiate various metal forming processes such as Hot and Cold Working, Rolling, Forging, Extrusion and Drawing Processes.

CO4-Classify different plastic molding processes, Extrusion of Plastic and Thermoforming.

UNIT-I

Patterns and Pattern making Introduction to Foundry - Steps involved in casting, advantages, limitations and applications of casting process. Pattern types, allowances for pattern, pattern materials, color coding and storing of patterns Moulding methods and processes-materials, equipment, Moulding sand ingredients, essential requirements, sand preparation and control, testing, cores and core making. Design considerations in casting, gating and Riser - directional solidification in castings, Metallurgical aspects of Casting

UNIT- II

Casting Processes Sand castings, pressure die casting, permanent mould casting, centrifugal casting, precision investment casting, shell Moulding, CO₂Moulding, continuous casting-squeeze casting, electro slag casting, Fettling and finishing, defects in Castings, Casting of non-ferrous materials Melting, Pouring and Testing.

Melting furnaces crucibles oil fired furnaces-electric furnaces-cupola, selection of furnace, calculation of cupola charges-Degasification, inoculation, pouring techniques casting defects and Inspection of castings.

UNIT- III

Basic Joining Processes Types of welding-gas welding, -arc welding,-shielded metal arc welding, GTAW, GMAW, SAW, ESW-Resistance welding (spot, seam, projection, percussion, flash types)-atomic hydrogen arc welding-thermit welding, Flame cutting - Use of Oxyacetylene, modern cutting processes, arccutting,

UNIT- IV

Special Welding Processes Soldering:- Brazing and braze welding and their application., welding of special materials – Stainless steel, Aluminum etc. weldability of cast iron, steel, stainless steel, aluminum alloys. Introduction to Electron beam and Laserwelding.

UNIT-V

Design of Weldments: Welding symbols-Positions of welding-joint and groove design-weld stress-calculations-design of weld size, estimation of weld dilution, heat input, effect of welding

parameters preheating, and post heating temperature: Selection of electrodes, flux etc. Weldments Testing and Metallurgy Inspection of welds – destructive and non-destructive testing methods, Defects in welding- causes and remedies, -effect of gases in welding-fatigue failure in Weldments.

Suggested List of Laboratory Practical (Expandable): Nil

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
SECOND YEAR-Semester-III
Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	THERMODYNAMICS	ME-3041	3L-1T-2P	6

Course Outcomes: After studying this course, students will be able to,

CO1-Students will be able to explain the basic principles and applications of the thermodynamics to the various real life systems.

CO2-Students will be able to describe fundamental laws of thermodynamics.

CO3-Students will be able to apply the concepts such as Entropy, Energy Balance also the calculations of heat, work and other important thermodynamic properties for various ideal gas processes.

CO4-Students will be able to estimate performance of various thermodynamic gas power cycles and gas refrigeration cycle and availability in each case.

UNIT - I

Basic concepts of Thermodynamics:- Property, Equilibrium, State, Process, Cycle, Zeroth law of thermodynamics, statement and significance, concept of an Ideal gas, Gas laws, Avogadro's hypothesis, Heat and work transfer. First law of thermodynamics- Statement of first law of thermodynamics, first law applied to closed system, first law applied to a closed system undergoing a cycle, processes analysis of closed system, flow process, flow energy, steady flow process, Relations for flow processes, limitations of first law of thermodynamics.

UNIT - II

Second law of thermodynamics:- Heat engine, heat reservoir, Refrigerator, heat pump, COP, EPR, Available energy, Carnot's theorem, Carnot's cycle, efficiency of Carnot's cycle, statement of second law Reversible and irreversible processes, consequence of second law, Entropy, Entropy change for ideal gas, T-S diagrams, Availability and Irreversibility. Gibbs and Helmholtz functions

UNIT - III

Real gas:- Deviation with ideal gas, Vander-wall's equation, evaluation of its constants, limitations of the equation. The law of corresponding states Compressibility factor, Generalized compressibility chart, P-V-surface of a Real gas, Thermodynamics relations, Maxwell relations and their applications.

UNIT - IV

Pure Substance:- Phase, Phase-transformations, formation of steam, properties of steam, PVT surface, HS, TS, PV, PH, TV diagram, processes of vapor measurement of dryness fraction, Use of steam table and Mollier chart.

UNIT - V

Air standard cycles:- Carnot, Otto, Diesel, Dual cycles and their comparison, two stroke and four stroke engines, Brayton cycle, non reactive gas mixture, PVT relationship, mixture of ideal gases, properties of mixture of ideal gases, internal energy, Enthalpy and specific heat of gas mixtures, Enthalpy of gas mixtures.

Text Book/References Books/ Websites

2. Van GJ; Thermodynamics; JohnWylen
3. Cengel Y; Thermodynamics; TMH
4. Arora CP; Thermodynamics; TMH
5. Thermal Engineering by RYadav
6. Engineering Thermodynamics by Omkar Singh New AgeInternational.
7. Engineering Thermodynamics by RathaKrishanan PHI India Pvt.Ltd.
8. Engineering Thermodynamics by M. Achuthan, PHIIndia.

Suggested List of Laboratory Experiments (Expandable):-

1. To study working of Gas turbines by models and to identify various processes of Brayton Cycle
2. Numerical on vapour processes and ideal gas processes (minimum two problems on each)
3. Study of fuel pump
4. Study fuel injector
5. Study of Carburetor
6. Study of steam turbine.
7. To Study the Rankine Cyclor Power Plant
8. Study of the processes of Heat Engine
9. To investigate the first law and Second law of thermodynamic using heat Engine

**R.K.D.F. UNIVERSITY, BHOPAL**

B.E. (Mechanical Engineering)
SECOND YEAR-Semester-III
Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
--------	---------------	--------------	------------------------	--------------

ME	VALUE EDUCATION	ME-3051	4L-0T-2P	6
-----------	------------------------	----------------	-----------------	----------

Course Outcomes:After studying this course, students will be able to

CO1-Students will understand the importance of value based living.

CO2-Students will gain deeper understanding about the purpose of their life.

CO3-Students will understand and start applying the essential steps to become good leaders

CO4-Students will emerge as responsible citizens with clear conviction to practice values and ethics in life

Chapter 1

Value Education

Concepts of Values-Definition and Types of values –The need for Education in values- Challenges for Value adoption-Character development-Vision of a better world

Chapter 2

Inculcation of values

Classification of values- Personal Values-Family Values-Social Values-Spiritual values-Benefits of value adoption

Chapter 3

Values for Professional excellence

Definition-Purpose-implementation-situations to adopt-reflection questions-quotable quotes of Active listening-Decision making-Determination-Perseverance-Discipline-Responsibility

Chapter 4

Business ethics

Ethics and Entrepreneurship- Professional Ethics –Ethical choices- Resolving Ethical Dilemmas- Leadership and Social Responsibility- Corporate Social Responsibility

Chapter 5

Quality of Life

Dealing with change-Trends, Organizations and the Individual-Self and the world-Quality from within- Relating to others-The dynamics of personal powers

Chapter 6

Exploring the self

True Identity-Anatomy of the self-The cyclic processes within the self-States of the awareness-Innate and Acquired qualities-Empowering the self

Chapter 7

Understanding Self-Esteem

Know self-esteem-Understanding the self-Components of self-esteem-**Association with self-esteem- Levels of self-esteem-Reflection exercises**

Chapter 8

Principles of living

Be introspective-Be an observer-Being optimistic-Appreciate differences-Don't compare yourself with others-Live at present

Chapter 9

Practical Meditation

Chapter 10

Exercises for Practice

Quiet reflection- Practice introversion-Being an observer-Stand back and observe -Self awareness (Soul consciousness)-Experiencing Body free stage-Reflect on original qualities-Visualize the Divine-Think attributes of the Supreme-Developing a living relationship-Surrender to God-Create Good wishes for all- Visualization in Meditation: Orbs of Light- The forest-The Balloon

Every chapter will have 1.Objectives 2.Introduction 9. Summary 10. Glossary and 11. Suggested Reading apart from the CONTENT as referred above

Text Book/References Books/ Websites:

1. Value, Spirituality and Consciousness Development; Rajyoga Education & Research Foundation (Education Wing)
2. Miles; Techniques of Value analysis and engineering; McGraw Hill Publication.
3. Heller Pub; Value Management; Addison Wesley.
4. Loughton; Value Analysis and Value; Pitman Publication

Suggested List of Laboratory Experiments (Expandable):-

1. To Study of Ethics and Value Education
2. To Study Education for Values in Engineering College – A Framework
3. To Study Approaches and Strategies of Value Education
4. To Study Key Dimensions for Mapping Value Contexts in Engineering College
5. To Study Guidelines for Implementation and Evaluation of Value Education
6. To Study Experiences and Innovations: Value Education in RKDF University, Bhopal
7. To Study Principles of Excellence in Value Education

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering)

SECOND YEAR-Semester-III

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	COMPUTER AIDED DESIGN	ME-3061	0L-0T-2P	2

Course Outcomes:After studying this course, students will be able to
CO1-Ability to create fully constrained solid models that can be quickly modified using standard software tools.

CO2-Ability to use, identify and explain standard features in solid modeling including protrusions, revolutions,
cutouts, and patterns

CO3-Ability to use standard software tools to create engineering drawings, or other documents, to fully describe
the geometries and dimensions of parts, as well as to document assemblies according to standard practice

CO4-Ability to use standard software tools to create part assemblies and check for clearances.

Introduction to CAD

Introduction to Computer Aided Drafting software for 2D and 3D Modeling, benefit, software's basic commands of drafting entities like line, circle, polygon, polyhedron, cylinders; transformations and editing commands like move, rotate, mirror, array.

- Practicing commands under Draw and Dimension Menu
- Practicing commands under Modify Menu.
- Practicing commands under Tool Menu.
- Practicing commands under Format Menu.
- Practicing commands under Express Menu.

Text Book/References Books/ Websites: Nil

Suggested List of Laboratory Experiments (Expandable):-

1. To Study The Introduction to CAD
2. To Study ACAD – Basics
3. To Study 2 - D Figures Using ACAD
4. To Study Isometric Drawings Using ACAD
5. To Study 3-D Figures Using ACAD

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
SECOND YEAR-Semester-IV
Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	ENGINEERING MATHEMATICS-III	ME- 4011	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,
CO1-Understand and apply knowledge of complex variables and integral for real life and engineering problems.
CO2-Able to apply the knowledge of various numerical methods and interpolation
CO3-Identify, formulate and solve engineering problems.
CO4-Understand and apply the concept of probability distribution to engineering problems

Unit

Fourier series: Introduction of Fourier series, Fourier series for Discontinuous functions, and Fourier series for even and odd function. Laplace Transform: Introduction of Laplace Transform, Laplace Transform of Elementary functions, properties of Laplace Transform, Change of scale property, second shifting property, Laplace transform of the derivative, Inverse Laplace transform & its properties, Convolution theorem, Applications of L.T. to solve the ordinary differential equations.

Unit II

Difference Operators:- Interpolation (Newton Forward & Backward Formulae, Central Interpolation Formulae, Lagrange's and divided difference formulae), Numerical Differentiation and Numerical Integration.

Unit III

Solution of Ordinary Differential Equations (Taylor's Series, Picard's Method, Modified Euler's Method, Errors & Approximations, Solution of Algebraic & Transcendental Equations (Regula Falsi, Newton-Raphson, Runge-Kutta Method, Milne's Predictor & Corrector method), Correlation and Regression, Curve Fitting (Iterative, Secant Method), Solution of simultaneous linear equations by Gauss Elimination, Gauss Jordan, Method of Least Square, Crout's methods, Jacobi's and Gauss-Siedel Iterative

Unit IV

Unit

Concept of Probability: Probability: Binomial, Poisson's, Continuous Distribution: Normal Distribution, Testing of Hypothesis | Students t-test, Fisher's z-test, Chi-Square Method.

B.E. (Mechanical Engineering)
SECOND YEAR-Semester-IV

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	KINEMATICS AND THEORY OF MACHINES	ME- 4021	3L-1T-2P	6

Course Outcomes:-After studying this course, students will be able to,
CO1-Kinematics & Theory of Machines I includes study of velocity, acceleration and force analysis of different mechanisms, power transmitting elements.
CO2-The students will be conversant with commonly used mechanism for industrial application.
CO3-The students will get competency in drawing velocity and acceleration diagram for simple and complex mechanism
CO4-Students will get analytical competency in solving kinematic problems using complex algebra method

UNIT - I

Introduction:-Links-types, Kinematics pairs-classification, Constraints-types, Degrees of freedom of planar mechanism, Grubler's equation, linkage mechanisms, inversions of four bar chain, slider crank chain and double slider crank chain Velocity in Mechanisms Velocity of point in mechanism, relative velocity method, Velocities in four bar mechanism, slider crank mechanism and quick return motion mechanism, Rubbing velocity at a pin joint, Instantaneous center method, Types & location of instantaneous centers, Kennedy's theorem, Velocities in four bar mechanism & slider crank mechanism

UNIT - II

Acceleration in Mechanisms:-Acceleration of a point on a link, Acceleration diagram, Coriolis component of acceleration, Crank and slotted lever mechanism, Klein's construction for Slider Crank mechanism Mechanisms with Lower Pairs Pantograph, Exact straight line motion mechanisms-Peaucellier's, Hart and Scott Russell mechanisms, Approximate straight line motion mechanisms-Grass-Hopper, Watt and Tchebicheff mechanisms, Analysis of Hooke's joint, Davis and Ackermann steering gear mechanisms.

UNIT - III

Friction:-Laws of friction, Friction on inclined plane, Efficiency on inclined plane, Friction in journal bearing-friction circle, Pivots and collar friction uniform pressure and uniform wear, Belt and pulley drive, Length of open and cross belt drive, Ratio of driving tensions for flat belt drive, centrifugal tension, condition for maximum power transmission, V belt drive Brakes & Dynamometers Shoe brake, Band brake, Band and Block brake, Absorption and transmission type dynamometers

UNIT - IV

Cams and Followers: – Classification & terminology, Cam profile by graphical methods with knife edge and radial roller follower for uniform velocity, simple harmonic and parabolic motion of followers, Analytical methods of cam design – tangent cam with roller follower and circular cams with flat faced follower

UNIT - V

Gears & Gear Trains:-Classification & terminology, law of gearing, tooth forms & comparisons, Systems of gear teeth, Length of path of contact, contact ratio, interference & under cutting in involute gear teeth, minimum number of teeth on gear and pinion to avoid interference, simple, compound, reverted and planetary gear trains, Sun and planet gear.

Text Book/References Books/ Websites:

1. Theory of Machines – Thomas Bevan
2. Theory of Machines and Mechanisms- Shigley
3. Theory of Machines and Mechanisms-Ghosh & Mallik
4. Theory of Machines and Mechanisms- Rao & Duggipati
5. Theory of Machines-S.S.Rattan
6. Kinematics of Machines-Dr. Sadhusingh
7. Mechanics of Machines – V.Ramamurti
8. Theory of Machines – Khurmi & Gupta
9. Theory of Machines – R. K. Bansal
10. Theory of Machines – V. P. Singh
11. Theory of Machines – Malhotra & Gupta

Suggested List of Laboratory Experiments (Expandable):-

1. To study of various types of Kinematic links, pairs, chains and Mechanisms.
2. To study of inversions of 4 Bar Mechanisms, Single and double slider crank mechanisms.
3. To study of plot slider displacement, velocity and acceleration against crank rotation for single slider crank mechanism.
4. To find coefficient of friction between belt and pulley.
5. To study of various type of cam and follower arrangements.
6. To study of plot follower displacement vs. cam rotation for various Cam Follower systems.
7. To study of generate spur gear involutes tooth profile using simulated gear shaping process.
8. To study of various types of gears – Helical, cross helical worm, bevel gear.
9. To study of various types of gear trains – simple, compound, reverted, epicycle and differential.

SECOND YEAR-Semester-IV Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	POWER PLANT ENGINEERING	ME-4031	4L-0T-2P	6

Course Outcomes:-After studying this course, students will be able to,
CO1-Students will be able to understand basic knowledge of Different types of Power Plants,site selection criteria of each one of them and understanding of Power Plant Economics,Energy Storage including compressed air energy and pumped hydro etc.
CO2-Students will be able to select the suitability of site for a power plant and will be able to calculate load factor, capacity factor, average load and peak load on a power plant. Students will also be able to propose ash handling, coal handling method in a the thermal power plant.
CO3-Students will be able to understand the working of Diesel & Gas Turbine Power plant.
CO4-Students will be able to design the Power Plant Instrumentation and understand Environmental Impact

Unit - I

Introduction Power and energy, sources of energy, review of thermodynamic cycles related to power plants, fuels and combustion calculations. Load estimation, load curves, various terms and factors involved in power plant calculations. Effect of variable load on power plant operation, Selection of power plant

Power plant economics and selection:-Effect of plant type on costs, rates, fixed elements, energy elements, customer elements and investor's profit; depreciation and replacement, theory of rates. Economics of plant selection, other considerations in plant selection.

Unit - II

Steam power plant:-General layout of steam power plant, Power plant boilers including critical and super critical boilers. Fluidized bed boilers, boilers mountings and accessories, Different systems such as coal handling system, pulverizers and coal burners, combustion system, draft, ash handling system, Dust collection system, Feed water treatment and condenser and cooling towers and cooling ponds, Turbine auxiliary systems such as governing, feed heating, reheating, flange heating and gland leakage. Operation and maintenance of steam power plant, heat balance and efficiency, Site selection of steam power plant.

Unit - III

Diesel power plant:-General layout, Components of Diesel power plant, Performance of diesel power plant, fuel system, lubrication system, air intake and admission system, supercharging system, exhaust system, diesel plant operation and efficiency, heat balance, Site selection of diesel power plant, Comparative study of diesel power plant with steam power plant.

Gas turbine power plant:-Layout of gas turbine power plant, Elements of gas

turbine power plants, Gas turbine fuels, cogeneration, auxiliary systems such as fuel, controls and lubrication, operation and maintenance, Combined cycle power plants, Site selection of gas turbine powerplant

Unit - IV

Nuclear power plant:-Principles of nuclear energy, Lay out of nuclear power plant, Basic components of nuclear reactions, nuclear power station, Nuclear waste disposal, Site selection of nuclear power plants. Hydro electric station Hydrology, Principles of working, applications, site selection, classification and arrangements, hydro-electric plants, run off size of plant and choice of units, operation and maintenance, hydro systems, interconnected systems. Non Conventional Power Plants Introduction to non-conventional power plants (Solar, wind, geothermal, tidal)etc.

Unit - V

Electrical system:-Generators and generator cooling, transformers and their cooling, bus bar, etc. Instrumentation Purpose, classification, selection and application, recorders and their use, listing of various control rooms. Pollution due to powergeneration.

Text Book/References Books/ Websites:

1. "Power Plant Engineering" F.T. Morse, Affiliated East-West Press Pvt. Ltd, New Delhi/Madras.
2. "Power Plant Engineering" Mahesh Verma, Metropolitan Book Company Pvt. Ltd. New Delhi
3. "Power Plant Technology" El-Vakil, McGrawHill.
4. "Power Plant Engineering by P.K. Nag, Tata McGrawHill.
5. "Steam & Gas Turbines & Power Plant Engineering by R.Yadav, CentralPub.House.

Suggested List of Laboratory Experiments (Expandable):-

1. To study of low pressure boilers and their accessories and mountings.
2. To study of high pressure boilers and their accessories and mountings.
3. To study of prepare heat balance sheet for given boiler.
4. To study of the working of impulse and reaction steam turbines.
5. To find dryness fraction of steam by separating and throttling calorimeter.
6. To find power output & efficiency of a steam turbine.
7. To study and find volumetric efficiency of a reciprocating air compressor.

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering)

SECOND YEAR-Semester-IV

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	MATERIAL SCIENCE & METTALURGY	ME-4041	4L-0T-2P	6

Course Outcomes:-After studying this course, students will be able to,

CO1-Be able to apply core concepts in Materials Science and Metallurgy to solve engineering problems.

CO2-Interpret about material fundamental and material processing.

CO3-Figure out the different mechanical properties of material by studying different destructive and non-destructive testing.

CO4-Acknowledge the importance of surface modification and study the different surfacemodification methods.

UNIT - I

Engineering Materials:-Classification of plain carbon steels; composition, properties & applications of low, medium & high carbon steels. Alloy steels: Free cutting steels; structural steel, spring steel, tool steel, high speed steels stainless steels. Effects of alloy element on properties of steels. Type of Cast irons: composition, properties & applications of each. Properties of aluminum; alloy of aluminum, (wrought & cast alloys), properties of copper, copper alloys (Brasses & Bronzes); Introduction and application to nano materials. Powder metallurgy- property and application.

UNIT - II

Plastic Deformation of Metals:-The tensile stress strain curve, Deformation by slip & by twinning, Dislocation theory, Theory of work hardening its effect on properties of metals, Recovery, Recrystallisation and grain growth; Hot and cold working of metals and their effect on mechanical properties, annealing, Introduction to creep, fracture and fatigue behavior of metals.

UNIT - III

Crystal Structure:-Mechanism of crystallization; unit cells, space lattice and lattice constants; Crystal systems, and Bravias Lattices; Body centered cubic, Face centered cubic and Hexagonal closed packed structure; Miller indices for planes and directions; Crystal imperfections; point defects, line defects and surface defects. Manufacturing and properties of refractory (acid, basic and natural).

UNIT - IV

Heat Treatment of Steels:-Definition, principle, and purpose of heat treatment.

Description of heat treatment methods: Hardening, Annealing, Normalizing, Tempering and case hardening with microstructure changes. Martempering & Austempering, Hardenability and its determination. Precipitation Hardening. Isothermal Transformation of steel, Transformation on continuous cooling, Critical cooling rate, Heat treatment furnace.

UNIT - V

Phase Diagrams:- Definition of phase, Equilibrium cooling of pure metals and binary alloys. Hume Rothery rule for solid solubility, Types of solid solution, Eutectic, Eutectoid and Peritectic reactions, Allotropy of iron, Iron-Iron carbon equilibrium diagram, relationship equilibrium diagram and properties of alloy.

Text Book/References Books/ Websites:

8. Engineering Material and Metallurgy by R.K. Rajput / S Chand
9. Material Science & Metallurgy for Engineering by O.P. Khanna, Dhanpat Rai

Suggested List of Laboratory Experiments (Expandable):-

1. To study of Iron Carbon Equilibrium Diagram of different phases.
2. To study of TTT (Temperature, Time, Transformation) Diagram.
3. To study of different types of crystal structure like HCP, BCC, FCC etc.
4. To study of Mechanical properties of materials.
5. To different types of crystal defects in materials.

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering)

SECOND YEAR-Semester-IV

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	MACHINE DRAWING	ME -4051	3L-1T-2P	6

Course Outcomes:-After studying this course, students will be able to,

CO1-Able to understand product symbols, weld symbols, pipe joints

CO2-Understand orthographic projections of machine elements

CO3-Understand isometric projections of machine elements

CO4-Understand detailed assembly drawings of Plummer block, Tailstock, Welded joints, tool head of shaper.

UNIT – I

Introduction:- Principles of Drawing, Requirements of production drawing, Sectioning and conventional representation, Dimensioning, symbols of standard tolerances, Machining Symbols such as external and internal threads, slotted heads, square ends, and flat radial ribs, slotted shaft, splined shafts, bearings, springs, gears. Introduction to Compute Aided Drafting software for 2D and 3D Modeling.

UNIT – II

Fasteners:- Various types of screw threads, types of nuts and bolts, screwed fasteners, welding joints and riveted joints.

UNIT - III

Assembly Machine Drawing:- Basic concept, plotting technique, assembly and blow up of parts, bill of materials, product data; Cotter and Knuckle joints, pedestal and footstep bearings, crosshead, stuffing box, IC engines parts - piston and connecting rods; lath machine parts.

UNIT - IV

Pipe and Pipe Fittings:- flanged joints, spigot and socket joint, union joint, hydraulic expansion joint. Couplings: Solid or Rigid Coupling, Protected Type Flange coupling, muff coupling, Oldham, universal coupling, cone friction clutch, free hand sketch of single plate friction clutch.

5. V Lakshmi Narayanan and Mathur, Text -book of MachineDrawing
6. Narayana and Reddy; Machine Drawing; New age,Delhi.
7. Dr. kk dewadi, Machine Drawing, DhanpatRai

Suggested List of Laboratory Experiments (Expandable):-

1. To Study of Conversion of pictorial views.
2. To Study of Sectional views of machine component.
3. To Study of Drawings of standard components.
4. To Study of Drawings of standard assemblies with components.
5. To Study of Drawings of small assemblies with components.
6. To Study of Detailed drawings of assembly.
7. To Study of Preparation and explanation on production drawings.
8. Assembly on Machine Drawing on Cutter joint.
9. Assembly on Machine Drawing on Knuckle Joint.
10. Assembly on Machine Drawing on pedestal and footstep bearings.
11. Assembly on Machine Drawing on crosshead.

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering)

SECOND YEAR-Semester-IV

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	JAVA PROGRAMMING	ME -4061	0L-0T-2P	2

Course Outcomes:-After studying this course, students will be able to,

The student should be able to use an integrated development environment to write, compile, run, and test simple object-oriented Java programs. Read and make elementary modifications to Java programs that solve real-world problems.

UNIT-I

Basic Java Features:- C++ Vs JAVA, JAVA virtual machine, Constant & Variables, Data Types, Class, Methods, Objects, Strings and Arrays, Type Casting, Operators, Precedence relations, Control Statements, Exception Handling, File and Streams, Visibility, Constructors, Operator and Methods Overloading, Static Members, Inheritance: Polymorphism, Abstract methods and Classes

UNIT-II

Java Collective Frame Work:- Data Structures: Introduction, Type-Wrapper Classes for Primitive Types, Dynamic Memory Allocation, Linked List, Stack, Queues, Trees, Generics: Introduction, Overloading Generic Methods, Generic Classes, Collections: Interface Collection and Class Collections, Lists, Array List and Iterator, Linked List.

Vector Collections Algorithms:- Algorithm sorts, Algorithm shuffle, Algorithms reverse, fill, copy, max and min Algorithm binary Search, Algorithms add All, Stack Class of Package java. Util, Class Priority Queue and Interface Queue, Maps, Properties Class, Un-modifiable Collections.

UNIT-III

Advance Java Features:- Multithreading: Thread States, Priorities and Thread Scheduling, Life Cycle of a Thread, Thread Synchronization, Creating and Executing Threads, Multithreading with GUI, Monitors and Monitor Locks. Networking: Manipulating URLs, Reading a file on a Web Server, Socket programming, Security and the Network, RMI, Networking, Accessing Databases with JDBC: Relational Database, SQL, MySQL and Oracle

UNIT-IV

Advance Java Technologies Servlets:- Overview and Architecture, Setting Up the Apache Tomcat Server, Handling HTTP get Requests, Deploying a web Application, Multitier Applications, Using JDBC from a Servlet, Java Server Pages (JSP): Overview, First JSP Example, Implicit Objects, Scripting, Standard Actions, Directives, Multimedia: Applets and Application: Loading, Displaying and Scaling Images, Animating a Series of Images, Loading and playing Audio clips

UNIT-V

Advance Web/Internet Programming (Overview):- J2ME, J2EE, EJB, XML.

References

1. Deitel&Deitel, "JAVA, How to Program"; PHI, Pearson.

2. E. Balaguruswamy, "Programming In Java"; TMHPublications
3. The Complete Reference: Herbert Schildt, TMH

List of Program to be perform (Expandable)

1. Installation ofJ2SDK
2. Write a program to show Concept of CLASS in JAVA.
3. Write a program to show Type Casting in JAVA.
4. Write a program to show How Exception Handling is in JAVA.
5. Write a Program to show Inheritance.
6. Write a program to show Polymorphism.

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering)

THIRD YEAR-Semester-V

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	DYNAMICS OF MACHINERY	ME-5011	3L-1T-2P	6

Course Outcomes: After studying this course, students will be able to,

CO1-The students will get competency in graphical and analytical method for solving problems in static and dynamic force analysis.

CO2-The students will get competency in conducting laboratory experiments for finding moment of inertia of rigid bodies, verification of displacement relation for Hokes joints, to measure power transmitted and absorbed by dy0mometer and brakes respectively.

CO3-The students will be able to understand working principles of various types of brakes, clutches and dynamometers.

CO4-This subject will help students to apply knowledge in the field of automobile, aerospace and Novel industries, where mechanisms and moving members force and kinematic analysis and Power transmitting elements play vital role.

UNIT - I

Force analysis: – Rigid body dynamics in general plane equation-Equations of motion-Dynamic force analysis-Inertia force and inertia torque-D'Alemberts principle-The principle of superposition-Dynamic analysis in reciprocating engines-Gas forces-Equivalent masses-Bearing loads-Crank shaft torque-Turning moment diagrams-Fly wheels-Engine shaking forces-Cam dynamics-Unbalance, Spring, Surge and Windup.

UNIT - II

Mechanisms For Control:- Governors-Types-Centrifugal governors-Gravity controlled and spring controlled centrifugal governors-Characteristics-Effects of friction-Controlling force-Other governor mechanisms.

Gyroscopes:- Gyroscopic forces and torques-Gyroscopic stabilization-Gyroscopic effects in automobiles, ships and airplanes.

UNIT - III

Balancing:- Static and dynamic balancing-Balancing of rotating masses-Balancing a single cylinder engine- Balancing multi- cylinder engines-Partial balancing in locomotive engines- Balancing linkages- Balancing machines.

UNIT - IV

Friction:- Frictional torque in pivots and collars by uniform pressure and uniform wear rate criteria. Boundary and fluid film lubrication, friction in journal and thrust bearings, concept of friction circle and axis, rolling friction.

Clutches: Single plate and multi plate clutches, Cone clutches.

UNIT - V

Belt Drives:- Velocity ratio, limiting ratio of tension; power transmitted; centrifugal effect on belts, maximum power transmitted by belt, initial tension, creep; chain and rope drives.

Brakes:- Band brake, block brakes, Internal and external shoe brakes, braking of vehicles.

Dynamometer: Different types and their applications.

Dynamic Analysis of Cams:- Response of un-damped cam mechanism (analytical method), follower response analysis by phase-plane method, jump and cross-over shock.

Text Book/References Books/ Websites

1. SS Rattan; Theory of machines; TMH
2. AG Ambekar; Mechanism and Machine Theory; PHI.
3. CS Sharma; Purohit K; Theory of Mechanism and Machines; PHI
4. Thomas Bevan; Theory of Machines; Pearson/ CBS PUB Delhi.
5. Ghosh and Mallick, theory of machine & mechanism
6. T. V. Ramachandra; Management of Municipal Solid Waste; TERI press.

Suggested List of Laboratory Practical (Expandable):

1. To study of inversion of single and double slider crank mechanism.
2. To study various types of kinematics links, pair, chains & mechanisms.
3. To study of simple four bar linkage mechanism
4. To study of various types of gears
5. To study of various types of gear trains.
6. To study of various types of Cam & follower arrangements.
7. To study of different types of belts.
8. To find the co-efficient of friction between wooden block and glass surface with horizontal surfaces.
9. To find the co-efficient of friction between wooden block and glass surface with inclined surfaces.

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
THIRD YEAR-Semester-V
Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
B.E. ME	FLUID MECHANICS	ME- 5021	3L-1T-2P	4

Course Outcomes: After studying this course, students will be able to,

CO 1-Use of various properties in solving the problems in fluids.

CO 2-Use of Bernoulli's equation for solutions in fluids.

CO 3-Determination of forces drag and lift on immersed bodies.

CO 4-Analyze the performance of hydraulic machines.

CO 5-Analyze the performance of pumps.

UNIT – I

Basic Concepts and Properties of Fluid:- – definition, distinction between solid and fluid - Units and dimensions - Properties of fluids - density, specific weight, specific volume, specific gravity, temperature, viscosity, compressibility, vapour pressure, capillary and surface tension - Fluid statics: concept of fluid static pressure, absolute and gauge pressures - pressure measurements by manometers and pressure gauges.

UNIT – II

Fluid Kinematics And Fluid Dynamics:- Fluid Kinematics - Flow visualization - lines of flow - types of flow - velocity field and acceleration - continuity equation (one and three dimensional differential forms)- Equation of streamline - stream function - velocity potential function - circulation - flow net – fluid dynamics - equations of motion - Euler's equation along a streamline - Bernoulli's equation – applications - Venturi meter, Orifice meter, Pitot tube - dimensional analysis - Buckingham's ? Theorem- applications - similarity laws and models.

UNIT – III

Incompressible Fluid Flow:- Viscous flow - Navier - Stoke's equation (Statement only) - Shear stress, pressure gradient relationship - laminar flow between parallel plates - Laminar flow through circular tubes (Hagen poiseulle's) - Hydraulic and energy gradient - flow through pipes - Darcy - weisback's equation - pipe roughness -friction factor- Moody's diagram-minor losses - flow through pipes in series and in parallel - power transmission - Boundary layer flows, boundary layer thickness, boundary layer separation - drag and lift coefficients.

UNIT – IV

Hydraulic Turbines:- Fluid machines: definition and classification - exchange of energy - Euler's

equation for turbo machines - Construction of velocity vector diagram's - head and specific work - components of energy transfer - degree of reaction.

Hydro turbines: definition and classifications - Pelton turbine - Francis turbine - propeller turbine - Kaplan turbine - working principles - velocity triangles - work done - specific speed - efficiencies - performance curve for turbines.

UNIT – V

Hydraulic Pumps:- definition and classifications Centrifugal pump: classifications, working principles. velocity triangles, specific speed, efficiency and performance curves - Reciprocating pump: classification, working principles, indicator diagram, work saved by air vessels and performance curves - cavitations in pumps - rotary pumps: working principles of gear and vane pumps

Suggested List of Laboratory Practical (Expandable):

- 1 To determine the coefficient of impact for vanes.
- 2 To determine coefficient of discharge of an orifice meter.
- 3 To determine the coefficient of discharge of Notch (V and Rectangular types)
- 4 To determine the friction factor for the pipes.
- 5 To determine the coefficient of discharge of venturimeter.
- 6 To determine the coefficient of discharge, contraction & velocity of an orifice.
- 7 To verify the Bernoulli's Theorem.
- 8 To find critical Reynolds number for a pipe flow.
- 9 To determine the meta-centric height of a floating body.
- 10 To determine the minor losses due to sudden enlargement, sudden contraction and bends.
- 11 To show the velocity and pressure variation with radius in a forced vortex flow.

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering)

THIRD YEAR-Semester-V

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	ARTIFICIAL INTELLIGENCE & NEURAL NETWORK	ME- 5031(A)	4L-0T-2P	6

Course Outcomes:

After studying this course, students will be able to

CO1. Learn about importance of AI techniques. Adoption of Artificial Intelligence (AI) technologies is widely expanding in our society.

CO2. Know the exact application of AI Techniques. Such applications use AI techniques to interpret information from a wide variety of sources and use it to enable intelligent, goal-directed behavior.

CO3. Understand the working of Modern AI based systems.

CO4. Know about sensors used in AI based systems.

Unit-1

Introduction:- Artificial Intelligence Main components and characteristics of AI (Feature Engineering, ANN, Deep Learning), Applications of AI, Advantages and disadvantages of AI, Goals of AI, Comparison of Programming of a System with AI and without AI, Challenges in AI, Programming languages preferably used in AI, Techniques/Algorithms used in AI, AI Software platforms, Future of AI.

Unit-2

Various types of production systems and search techniques:- Types of production systems, Characteristics of production systems, Study and comparison of breadth first search and depth first search. Techniques, other Search Techniques like hill Climbing, Best first Search. A* algorithm, AO* algorithms etc, and various types of control strategies.

Unit-3

Knowledge Representation and Probabilistic Reasoning:- Problems in representing knowledge, knowledge representation using propositional and predicate logic, comparison of propositional and predicate logic, Resolution, refutation, deduction, theorem proving, inferencing, monotonic and nonmonotonic reasoning. Probabilistic reasoning, Bayes' theorem, semantic networks, scripts, schemas, frames, conceptual dependency, fuzzy logic, forward and backward reasoning.

Unit-4

Game playing techniques:- Minimax procedure, alpha-beta cut-offs etc, planning, Study of the block world problem in robotics, Introduction to understanding and natural languages processing.

Unit-5

Introduction to Neural Network (NN):- Introduction, benefits of neural network, models of Neural Network.

Learning Processes: Various techniques used in learning, introduction to Artificial neural networks, common sense, reasoning, Convolution Neural Network, Feedforward Neural Network, Recurrent Neural Network, Multilayer perceptron, Architecture / Three Layers in Artificial Neural Networks, Implementation of ANN, Applications of ANN in images, signals and language some example of expert systems.

4. B. Yegnanarayana , Artificial Neural Networks PHI
5. Schalkof, Artificial Neural Networks. Mc Graw HILL Education
6. S. Haykin: Neural Networks- A Comprehensive Foundation, PHI Learning,

EVALUATION: Evaluation will be continuous and integral part of the class as well as through external assessment.

Suggested List of Laboratory Practical (Expandable):

1. To study the functions of Driverless car with help of neat sketch diagram.
2. To write any one programme with help of Python Language.
3. To study of machine Learning, Explain with help of any programme.
4. To Plot neuron output over the range of inputs with help of sketch.
To study with help of AI and show case study of any one:
 - (a) Cancer Detection
 - (b) Character Recognition
 - (c) Iris Clustering.
6. To study of ANN and explain the commonly used ANN with help of Blok Diagram.
7. To study of Fuzzy logic Architecture.

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering)

THIRD YEAR-Semester-V

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	MECHATRONICS ENGINEERING	ME- 5041(A)	4L-0T-2P	6

Course Outcomes: After studying this course, students will be able to

CO 1 Identification of key elements of mechatronics system and its representation in terms of block diagram,

CO 2 Understanding the concept of signal processing and use of interfacing systems such as ADC, DAC, digital

CO3 Understand principles of sensors, its characteristics, interfacing with DAQ microcontroller

Interfacing of Sensors, Actuators using appropriate DAQ micro- controller

CO 4 Outline appropriate sensors and actuators for an engineering application.

Unit-1

Introduction:- Introduction to mechatronics, Examples of mechatronics systems, definition of Mechatronics, Multi-disciplinary scenario, origins. Evaluation of Mechatronics, An over view of mechatronics, Design of mechatronics system. Measurements system and function of main elements of measurement systems. Need for mechatronics in industries. Objectives, advantages and disadvantages of mechatronics. Microprocessor based controllers. Principle of working of engine management system, automatic washing machine.

Unit-2

Transducers and Sensors:- Definition and classification of transducers. Definition and classification of sensors. Principle of working and applications of light sensors, proximity sensors and Hall effect sensors.

Microprocessor:- Microprocessor based digital control. Digital number system, binary and hexadecimal number system, Logic functions, Karnaugh Map, Data word representation basic Elements of control systems.

Unit-3

Microprocessor Architecture:- 8085A processor architecture Terminology-such as, CPU, memory and address, ALU, assembler, data, registers, Fetch cycle, write cycle, state, bus interrupts. Micro controllers - difference between microprocessor and micro controllers. Requirements for control and their implementation in micro controllers. Classification of micro controllers.

Unit-4

Electrical Actuators:- Actuator and actuator system. Classifications of actuator system with examples. Mechanical switches. Concept of bouncing Methods of Preventing bouncing of mechanical switches. Solenoids, Relays. Solid state switches - Diodes, Thyristors, Triacs, Transistors, Darlington pair.

Electrical actuator:- Principle, construction and working of AC, DC motors, stepper motors, permanent motors, servomotors, Servo systems and control

Hydraulic Actuators:- Valves Classifications, Pressure Control Valves , Pressure relief valves, Pressure regulating/reducing valves, Pressure sequence valve. Flow control valves, Principle, needle valve, globe valve. Direction control valve,sliding spool valve, solenoid operated.

Unit-5

Single Conditioning:- Concept, necessity, op-amps, protection, filtering, wheat stone bridge, Digital Signals Multiplexer. Data acquisition, Introduction to signals, and systems to digital signal processing, Concepts and different methods.

Text Book/References Books/ Websites

2. Mechatronics - W. Bolton, Longman, Pearson Education Asia -2nd Edition, 2001.
3. Introduction to mechatronics and measurement systems -David G. Alciatore & Michel BiHstand - Tata McGraw Hill -2000
4. Mechatronics - H.D. Ramachandra - Sudha Publication -2003
5. Mechatronics by HMT Ltd. - Tata McGrawHill -2000.
6. Mechatronics System design by Devadas Shetty and Richard A. Kark-Thomas Learning -1997.
7. Mechatronics an Introduction by Robert H Bishop - CRC
8. Mechatronics systems Fundamentals by Rolf Isermann – Springer
9. Mechatronics: An Integrated Approach by C.W.De Silva, Publisher: CRC;
10. Microprocessor and Architecture, Programming and Applications with 8085/8085A- R.S.Ganokar, *Wiley Eastern*

Suggested List of Laboratory Practical (Expandable):

1. To perform the 8 - bit addition using 8085 Microprocessor.
2. To sort an array of „n“ element in ascending order using 8085 microprocessor.
3. To run a stepper motor at different speeds and different directions using 8051 assembly language.
4. To measure the speed of DC motor using optical sensor.
5. To study the characteristics between the strains applied to the cantilever beam strain sensor and the bridge voltage.
6. To study the characteristics of LVDT position sensor with respect to the differential voltage.
7. To study the characteristics of temperature measurement system and the accuracy of signal conditioning board.

8. To construct a pneumatic circuit to actuate the single acting cylinder using a two-way pressure valve.
9. To study the actuation of double acting cylinder using electrical push button switch in meter - in circuit.
10. To study the actuation of the rotary actuator using electrical push button switch in meter - out circuit.
11. To actuate the single acting cylinder with PLC using OFF delay timer.

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
THIRD YEAR-Semester-VI
Course Content & Grade

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	INTERNAL COMBUSTION ENGINE	ME - 6011	4L-0T-2P	6

Course Outcomes:- After studying this course, students will be able to,

CO1-To teach students the operating characteristics and thermodynamic analysis of common internal combustion engine cycles

CO2- To teach students to analyze the combustion process of common fuels.

CO3- To make students aware of the roles of fluid flow and heat transfer in engine operation.

CO4-To teach students the environmental, social, and technological issues related to the future widespread use of internal combustion engines

UNIT – I

Internal Combustion Engine:- S.I. and C.I. engines of two and four stroke cycles, determination of engine dimensions, speed, fuel consumption, output, mean effective pressure, efficiency, factors effecting volumetric efficiency, heat balance, cylinder arrangement, firing order, power balance for multi-cylinder engines, valve timing. Thermodynamic properties of fuel-air mixture before and after combustion, deviations of actual cycle from Ideal conditions.

UNIT – II

Combustion in S.I. Engines:- The Process of combustion, Effects of engine variables on ignition lag and flame propagation, abnormal combustion, knocking, effects and control of knock, Knock theory, effects of engine variable on knock, S.I. Engine fuel properties, Knock rating of fuel, octane number, additives, requirements of combustion chamber, Design Principles, Types of combustion chambers, merits.

Combustion in C.I. Engines:- Combustion Process, Stages, diesel knock, effects of operating parameters on knock, knock Control, rating of C.I. engine fuels, Cetane number, types and requirements of the combustion chambers.

Emission and Control:- SI and CI engine emissions, effects of pollutants on human health and biological sphere, Control of emissions from SI and CI Engines, Introduction to Noise Pollution & its Control.

UNIT – III

Engine Operating Systems:- Valves and valve gear, lubrication systems, and system components, lubricating oils, properties and rating, additives. Cooling systems, temperature gradients in engine parts, various methods of cooling, Power absorbed in cooling, Properties of coolants, additives. Fuel systems for SI and CI engines, F/A ratio requirements for different operating conditions, fuel transfer pump, fuel injection pump, injector, Modern carburetors, MPFI in SI engines. Conventional & Modern Ignition system, firing order.

UNIT – IV

Engine Performance:- Testing of Engines - their performance characteristics, Heat Balance sheet, Scavenging processes, Volumetric, charging and scavenging efficiencies, scavenging methods and systems of four stroke and two stroke engines.

UNIT-V

Supercharging:- Supercharging suitability for SI and CI engines and effect of attitude on mixture strength and output of S.I. engines, Types of supercharging, analysis and performance, low and high pressure super charging, exhaust, gas turbo-charging, supercharging of two stroke engines.

Text Book/References Books/ Websites:

1. I.C. Engine by M.L. Mathur, R.P.Sharma; Dhatpat Rai Pub.
2. I.C. Engine by V. Ganeshan ; Tata McGra Hill.
3. I.C. Engines by Anand V. Domkundwar, V.M. Domkundwar; Dhatpat Rai Pub

Suggested List of Laboratory Practical (Expandable):

1. To Study four strokes spark ignition (S.I) Engine and differences between S.I. ad C.I engines.
2. To study two Strokes S.I. engine and differences between two strokes and four strokes engines.
3. To study battery ignition system for four cylinders S.I. engines and requirements of ignition system.
4. To study magneto ignition system for SI engine having four cylinders and differences between magneto and battery Ignition system.
5. Study of carburetor with compensating and starting Jet devices.
6. Determination of Brake power (BP), friction power (FP) and Indicated power (IP) of four stroke four cylinder diesel engine with rope break dynamometer.

7. To determine Mechanical efficiency, Brake thermal efficiency and indicated thermal efficiency of four strokes, four cylinder diesel engine.
8. To draw heat balance sheet for four stroke, four cylinder diesel engines.
9. To study open cycle constant pressure combustion gas turbine with inter cooler, regenerator and reheater
10. To study centrifugal compressor and differences between centrifugal and axial compressors.

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
THIRD YEAR-Semester-VI
Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	MACHINE COMPONENT DESIGN	ME - 6021	3L-1T-2P	6

Course Outcomes: After studying this course, students will be able to,

- CO1- Helping the student in machine design their technical ideas
- CO2- Creating knowledge about the various practices with regard to the shaft, bearing and development of views
- CO3- Understanding the importance of the linking functional and visualization aspects in the preparation of the part object
- CO4- Interpretation of machine Component that in turn help the students in the preparation of the production of machine Component.

UNIT – I

Introduction:- Basic design concepts, design process, stages/phases in design, flowchart, problem formulation, design considerations (strength, manufacturing, maintenance, environment, economics and safety); design for recycle and reuse, Design and safety factors for steady and variable loads, impact and fatigue considerations, reliability and optimization, standardization in design.

UNIT – II

Power Transmissions Systems, Pulleys:- Transmission of power by Belt and Rope drives, Transmission efficiencies, Belts – Flat and V types – Ropes - pulleys for belt and rope drives, Materials, Chain drives.

Spur & Helical & Bevel Gear Drives :- Spur gears- Helical gears – Load concentration factor – Dynamic load factor. Surface compressive strength – Bending strength – Design analysis of spur gears – Estimation of centre distance, module and face width, check for plastic deformation. Check for dynamic and wear considerations. Design bevel gear and its application.

UNIT – III

Springs:- Design of helical compression and tension springs, leaf springs and torsion springs; fatigue loading of springs, surge in spring.

Shafts:- Design of shaft under combined bending, twisting and axial loading; shock and fatigue factors, design for rigidity; Design of shaft subjected to dynamic load; Design of keys and shaft couplings.

UNIT – IV

Bearings :- Types of Journal bearings – Lubrication – Bearing Modulus – Full and partial bearings – Clearance ratio – Heat dissipation of bearings, bearing materials – journal bearing design – Ball and roller bearings – Static loading of ball & roller bearings, Bearing life.

Design of power screws:- Design of screw, Square ACME, Buttress screws, design of nut, compound screw, differential screw, ball screw- possible failures.

UNIT – V

Brakes & Clutches:- Materials for friction surface, uniform pressure and uniform wear theories, Design of friction clutches: Disk , plate clutches, cone & centrifugal clutches. Design of brakes: Rope, band & block brake, Internal expanding brakes, Disk brakes

Engine Parts : Connecting Rod : Thrust in connecting rod – stress due to whipping action on connecting rod ends – Cranks and Crank shafts, strength and proportions of over hung and center cranks – Crank pins, Crank shafts.

7. Sharma and Purohit; Design of Machine elements; PHI
8. Data Books : (I) P.S.G. College of Technology (ii) Mahadevan

Suggested List of Laboratory Practical (Expandable):

1. To design of the different types of Brake.
2. To design of the different types of clutch.
3. To design of connecting rod.
4. To design of center crankshaft.
5. To design of crane hook.
6. To Study of Different Types of Power Transmission System.
7. To Study of Different types of shaft
8. To Study of Different types of spring.
9. To Study of Different types of Bearing

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
THIRD YEAR-Semester-VI
Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	GAS DYNAMICS	ME – 6031(A)	4L-0T-2P	6

Course Outcomes: After studying this course, students will be able to,

CO1- Explain basic concepts of gas dynamics and describe the basic fundamental equations of one dimensional flow of compressible fluid and isentropic flow of an ideal gas.

CO2- Analyze the steady one-dimensional isentropic flow; frictional flow and isothermal flow and express the concepts of steady one dimensional flow with heat transfer

CO3- Discuss the effect of heat transfer on flow parameters.

CO4- Describe the jet propulsion engines

UNIT - I

Introduction to gas dynamics:- control volume and system approaches acoustic waves and sonic velocity - Mach number - classification of fluid flow based on mach number - mach cone-compressibility factor - General features of one dimensional flow of a compressible fluid - continuity and momentum equations for a control volume.

UNIT - II

Isentropic flow of an ideal gas:- basic equation - stagnation enthalpy, temperature, pressure and density- stagnation, acoustic speed - critical speed of sound dimensionless velocity-governing equations for isentropic flow of a perfect gas - critical flow area - stream thrust and impulse function. Steady one dimensional isentropic flow with area change-effect of area change on flow parameters chocking- convergent nozzle.

UNIT - III

Simple frictional flow:- adiabatic flow with friction in a constant area duct governing equations -

fanno line limiting conditions - effect of wall friction on flow properties in an Isothermal flow with friction in a constant area duct governing equations - limiting conditions. Steady one dimensional flow with heat transfer in constant area ducts- governing equations - Rayleigh line entropy change caused by heat transfer
- conditions of maximum enthalpy and entropy.

UNIT - IV

Effect of heat transfer on flow parameters:- Intersection of Fanno and Rayleigh lines. Shock waves in perfect gas- properties of flow across a normal shock - governing equations - Rankine Hugoniat equations

Prandtl's velocity relationship - converging diverging nozzle flow with shock thickness – shock strength.

UNIT-V

Steam nozzles:- isentropic flow of vapors, flow of steam through nozzles, condition for maximum discharge, effect of friction, super-saturated flow.

THIRD YEAR-Semester-VI

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	MECHANICAL MEASUREMENT & CONTROL	ME – 6041(A)	4L-0T-2P	6

Course Outcomes, After studying this course, students will be able to
CO1-Inspection of engineering parts with various precision instruments.

CO2- Principles of measuring instruments and gauges and their uses.

CO3- Understand the importance of material properties in designing the mechanical systems and identify the material for specific applications

CO4- Understand the changes in phases of material with respect to time and temperature

UNIT-I

Mechanical Measurements Introduction:- Introduction to measurement and measuring instruments, Generalized measuring system and functional elements, units of measurement, static and dynamic performance characteristics of measurement devices, calibration, concept of error, sources of error, statistical analysis of errors. 4 Sensors and Transducers: Types of sensors, types of transducers and their characteristics 2 Signal transmission and processing: Devices and systems. 2 Signal Display & Recording Devices.

UNIT-II

Statistics:- Least square regression analysis and data outlier detection; Normal distribution and concept of standard deviation of the mean in finite data set, Uncertainty Analysis: Measurement errors; error sources: calibration, data acquisition, data reduction; Design stage uncertainty analysis; combining elemental errors; Bias & Precision errors; Error propagation, Higher order uncertainty analysis.

UNIT-III

Metrology:- Metrology and Inspection: Standards of linear measurement, line and end standards .Limit fits and tolerances. Interchange ability and standardization. Linear and angular measurements devices and systems Comparators: Sigma, Johansson's Microkrator. Limit gauges classification, Taylor's Principle of Gauge Design.

UNIT-IV

Measurement of geometric forms:- straightness, flatness, roundness. Tool maker's microscope, profile project autocollimator. Interferometer: principle and use of interferometer, optical flat. Measurement of screw threads and gears.

Surface texture :- quantitative evaluation of surface roughness and its measurement.

UNIT-V

Introduction:- Concept of Automatic Controls – open loop & closed loop systems. Servo mechanisms. Block diagrams, transfer functions. Applications of Laplace-Transform in control systems with simple examples / numerical. Controllers: Brief introduction to Pneumatic, hydraulic and electric controllers Modeling: Modeling of mechanical systems, modeling of electrical systems, signal flow graphs, modeling of fluid systems, liquid level systems, hydraulic systems, modeling of thermal systems.

Text Book/References Books/ Websites:

9. Raven, "Automatic Control Theory", McGraw Hill Publishers.
10. Nagrath and Gopal, "Control System Engineering", New Age Publishers.

Suggested List of Laboratory Practical (Expandable):

1. To study of different types of transducers
 - (a) Pressure transducers.
 - (b) Temperature Transducers.© LVDT.
2. To study of open loop and closed loop system.
3. To study different types of surface roughness textures.
4. To study of different types of comparators.

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
THIRD YEAR-Semester-VI
Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	ADVANCE WORKSHOP PRACTISE	ME - 6061	0L-0T-2P	2

Course Outcomes:- After studying this course, students will be able to

CO1-Student will be able to make various joints in the given object with the available work material

CO2- Student will be able to know how much time a joint will take for the assessment of time

UNIT - I

Lathe: Classification of machine tools and their basic components; lathe- specification, components & accessories, various operations on lathes, capstan & turret lathes, tool layout, methods of thread production, machining time, single point cutting tools, tool signature and nomenclature

UNIT - II

Grinding:- Types of grinding machines, surface, cylindrical and internal grinding, grinding wheels, specifications, wheel turning and dressing without eccentricity, centre-less grinding.

UNIT - III

Milling:- Vertical, horizontal and universal type machines, specifications and classifications of milling machines, universal dividing head plain and different indexing, gear cutting, milling cutters.

Drilling & Broaching:- Fixed spindle, radial and universal drilling machines, drilling time, broaching principle, broaches and broaching machines.

UNIT - IV

Shapers:- Classification and specifications, principle parts, quick return mechanism, shaper operations, speed feed, depth of cut, machining time. Surface qualities, equipment used for rating surfaces, rms. CLA value, causes for surface irregularities.

Gear Cutting:- Die casting, methods of forming gears, generating process, Gear shaping, gear shaving, gear grinding gear testing.

UNIT - V

Control System:- Introduction to control systems, analog control, transfer function, procedure for writing transfer function, signal flow diagram, introduction to electronic components like switches, magnetic type, electromagnetic type, transducers and other sensors, servo motors, basics of CD-ROM players, PLC, applications, CNC machines.

5. Alciatori DG, Histan MB; Introduction to Mechatronics and Measurement system; TMH
6. HMT; Production Processes; TMH

Suggested List of Laboratory Practical (Expandable):

1. To make a job on lathe machine with all operations like turning, step turning, drilling, taper turning, thread cutting and knurling.
2. Study of center less grinding machine/ tool and cutter type grinding machine.
3. Study of horizontal/ universal milling machine, diving head and indexing mechanism of it.
4. To cut a spur gear on milling machine using rapid indexing method.
5. Study of radial drilling machine and preparing a job on it.
6. To study a shaper machine to learn about working of quick return mechanism.

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering)

THIRD YEAR-Semester-VI

Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	MINOR PROJECT I	ME -6081	0L-0T-2P	2

Course Outcomes: After studying this course, students will be able to,

CO1- Enable the Students to undertake short research projects in a team under the direction of members of the faculty

CO2-To impart skills in preparing detailed report describing the project and results.

CO3- To enable the students to undertake fabrication work of new experimental set up/devices or develop software packages

CO4-To effectively communicate by making an oral presentation before an evaluation committee

Contents (Theory)

Students shall be encouraged to form groups (Maximum 5) to do a Minor Project on technical topic of concern branch. The student should prepare a working system or some design or understanding of a complex system (on minor level) that he has selected for his/her minor project work using system analysis tools and submit the same in the form of a write-up i.e. detail project report. The student should maintain proper documentation of different stages of project such as concept evaluation, requirement specification, objectives, work plan, analysis, design, implementation and test plan wherever applicable. Each student is required to prepare a project report based on the above points and present the same at the final examination with a demonstration of their project.

Suggested List of Laboratory Experiments :- (Expandable): Nil

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering) FOURTH YEAR-Semester-VII Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	HEAT AND MASS TRANSFER	ME - 7011	3L-1T-2P	6

Course Outcomes: After studying this course, students will be able to,

CO1-Students will be able to comprehend the different mode of heat transfer

CO2-Students are expected to formulate basic equations and Laws for heat transfer Problems

CO3- To understand the knowledge of mass transfer by applying principles of diffusion, mass transfer coefficients and inter phase mass transfer.

CO4-Applications of heat transfer principles to design and calculate performance of thermal systems related to one dimensional, steady state and transient state for conduction and convection heat transfer

UNIT-I

Introduction to Heat Transfer:- Concepts of the mechanisms of heat flows; Conduction, convection and radiation; Effect of temperature on thermal conductivity of materials; Introduction to combined heat transfer mechanism. 2 Conduction: One-dimensional general differential heat conduction equation in the rectangular, cylindrical and spherical coordinate systems; Initial and boundary conditions. Steady State one-dimensional Heat conduction : Composite Systems in rectangular, cylindrical and spherical ordinates with and without energy generation; Thermal resistance concept; Analogy between heat and electricity flow; Thermal contact resistance; Critical thickness of insulation.

UNIT-II

Fins:- Heat transfer from extended surfaces, Fins of uniform cross-sectional area Errors of measurement of temperature in thermometer wells. Transient Conduction: Transient heat conduction; Lumped capacitance method; Time constant; Unsteady state heat conduction in one dimension only, Heisler charts

UNIT-III

Forced Convection:- Basic concepts; Hydrodynamic boundary layer; Thermal boundary layer; Approximate integral boundary layer analysis; Analogy between momentum and heat transfer in turbulent flow over a flat surface; Mixed boundary layer; Flow over a flat plate; Flow across a single cylinder and a sphere; Flow inside ducts; Empirical heat transfer relations; Relation between fluid friction and heat transfer; Liquid metal heat transfer. Natural Convection : Physical mechanism of natural convection; Buoyant force; Empirical heat transfer relations for natural convection over vertical planes and cylinders, horizontal plates and cylinders, and sphere ; Combined free and forced convection.

UNIT-IV

Thermal Radiation:- Basic radiation concepts; Radiation properties of surfaces; Black body radiation Planck's law, Wein's displacement law, Stefan Boltzmann law, Kirchhoff's law; ; Gray body; Shape factor; Black-body radiation; Radiation exchange between diffuse non black bodies in an enclosure; Radiation shields; Radiation combined with conduction and convection; Absorption and emission in gaseous medium; Solar radiation; Green house effect.

UNIT-V

Heat Exchanger:- Types of heat exchangers; Fouling factors; Overall heat transfer coefficient; Logarithmic mean temperature difference (LMTD) method; Effectiveness-NTU method; Compact heat exchangers. Condensation And Boiling : Introduction to condensation phenomena; Heat transfer relations for laminar film condensation on vertical surfaces and on outside & inside of a horizontal tube; Effect of non-condensable gases; Drop wise condensation; Heat pipes; Boiling modes, pool boiling; Hysteresis in boiling curve; Forced convective boiling. Introduction To Mass Transfer: Introduction; Fick's law of diffusion; Steady state equimolar counter diffusion; Steady state diffusion through a stagnant gas film.

Text Book/References Books/ Websites:

2. Heat Transfer By J.P. Holman, McGraw-Hill International edition.
3. Schaum's outline of Heat Transfer by Pitts & Sisson McGraw-Hill International edition.
4. Principles of Heat Transfer by Frank Kreith, McGraw-Hill Book co.
5. Fundamentals of Momentum, Heat and Mass Transfer by JamesR.Welty; John Wiley &

Sons (Pvt). Ltd.

6. Heat Transfer, by Vijay Gupta, New Age International (P) Ltd. Publishers
7. Heat Transfer, by Y.V.C. Rao, University Press.
8. Heat Transfer, by R. Yadav, Central Publishing House, Allahabad

Suggested List of Laboratory Practical (Expandable):

1. Study of Conduction through composite wall.
2. Study of Thermal conductivity of slab.
3. Study of Pin fin in natural/forced convection.
4. Study of Parallel and Counter flow in a double pipe heat exchanger.
5. Study of Free/Natural convection.
6. Study of Two phase heat transfer.
7. Study of Emissivity measurement.

R.K.D.F. UNIVERSITY, BHOPAL

**B.E. (Mechanical Engineering)
FOURTH YEAR-Semester-VII
Course Content & Grade**

Branch	Subject Title (Departmental Elective)	Subject Code	Contact Hours per Week	Total Credit
ME	AUTOMOBILE ENGINEERING	ME – 7021 (A)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1- Identify the different parts of the automobile

CO2-Explain the working of various parts like engine, transmission, clutch, brakes

CO3-Understand the environmental implications of automobile emissions

CO4- Develop a strong base for understanding future developments in the automobile industry

UNIT - I

Vehicle Structure and Engines: - Types of automobiles, vehicle construction and different layouts, chassis, frame and body, resistances to vehicle motion and need for a gearbox, components of engine-their forms, functions and materials

UNIT - II

Engine Auxiliary Systems:- Electronically controlled gasoline injection system for SI engines., Electronically controlled diesel injection system, Unit injector system, Rotary distributor type and common rail direct injection system), Electronic ignition system, Turbo chargers, Engine emission control by three way catalytic converter system.

UNIT - III

Transmission Systems:- Clutch-types and construction, gear boxes- manual and automatic, gear shift mechanisms, over drive, transfer box, fluid flywheel –torque converter, propeller shaft, slip joints, universal joints, Differential, and rear axle, Hotchkiss Drive and Torque Tube Drive.

UNIT - IV

Steering, Brakes And Suspension Systems:- Steering geometry and types of steering gear box-Power Steering, Types of Front Axle, Types of Suspension Systems, Pneumatic and Hydraulic Braking Systems, Antilock Braking System and Traction Control

UNIT-V

Electrical And Control Systems:- Storage battery, construction and operation of lead acid battery, testing of battery, principle of operation of starting mechanism, different drive systems, starter relay switch, regulator electric fuel gauge, fuel pump, horn, wiper, Lighting system, head light dazzling, signaling devices, battery operated vehicles, choppers. Importance of maintenance, scheduled and unscheduled maintenance, wheel alignment, trouble Shooting probable causes & remedies of various systems, microprocessor based control system for automobile, intelligent automobile control systems.

THIRD YEAR-Semester-VII
Course Content & Grade

Branch	Subject Title (Departmental Elective)	Subject Code	Contact Hours per Week	Total Credit
ME	MECHANICAL SYSTEM DESIGN	ME – 7021(B)	3L-1T-0P	4

Note: PSG Design data book and/ or Mahadevan and Reddy's Mechanical design data book are to be provided/ permitted in exam hall (duly verified by authority)

Course Outcomes: After studying this course, students will be able to,

CO1-Apply different types power transmission drive in practical use.

CO2-Understand different types of slip less drive like gears in different machinery.

CO3-Undertake different types of internal combustion engines in vehicles and different drives.

CO4-Undertake project work different types of optimization techniques.

Unit I

Design of Belt, Rope and Chain Drives:-Methods of power transmission, selection and design of flat belt and pulley; Selection of V-belts and sheave design; Design of chain drives, roller chain and its selection; Rope drives, design of rope drives, hoist ropes.

UnitII

Spur and Helical Gears:-Force analysis of gear tooth, modes of failure, beam strength, Lewis equation, form factor, formative gear and virtual number of teeth; Gear materials; Surface strength and wear of teeth; strength against wear; Design of straight tooth spur and Helical Gears.

Bevel Gears: Application of bevel, formative gear and virtual number of teeth; Force analysis; Lewis equation for bevel gears; Strength against wear; Design of bevel gear.

Unit III

Design of I.C. Engine Components:-General design considerations in I C engines; design of cylinder; design of piston and piston-rings; design of connecting rod; design of crankshaft.

Unit IV

Design of Miscellaneous Components:-design of Flanged coupling; Rigid coupling, Design of Pressure vessels subjects to internal pressure, external pressure, design of penetration, design of flanges, cone cylinder junctions ,Materials, Fabrication.

Unit V

Optimization:- Basic concept of optimization, classification of optimization, optimization Techniques, engineering applications of optimization. Classical optimization techniques: unconstrained optimization single-variable optimization, multivariable optimization, solution by direct search method, solution by Lagrange-multipliers method.

B.E. (Mechanical Engineering)
SECOND YEAR-Semester-VII
Course Content & Grade

Branch	Subject Title (Departmental Elective)	Subject Code	Contact Hours per Week	Total Credit
ME	MATERIAL HANDLING EQUIPMENT	ME – 7021 (C)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1- To discuss the material handling equipments& their applications.

CO2- To study the construction, working & maintenance of traction type conveyors

CO3- To discuss the different components of material handling systems.

CO4- To study the mechanism used in material handling equipment in industries.

UNIT – I

Introduction:-Types of interplant transporting facility, principal groups of material handling equipments, choice of material handling equipment, hoisting equipment, screw type, hydraulic and pneumatic conveyors, general characteristics of hoisting machines, surface and overhead equipments, general characteristics of surface and overhead equipments and their applications.

UNIT – II

Material Handling Equipment:- To control of hoisting equipments, Flexible hoisting appliances like

ropes and chains, welded load chains, roller chains, selection of chains hemp rope and steel wire rope, selection of ropes, fastening of chains and ropes , different types of load suspension appliances, fixed and movable pulleys, different types of pulley systems, multiple pulley systems . Chain and rope sheaves and sprockets.

UNIT – III

Load handling attachments:- Standard forged hook, hook weights, hook bearings, cross piece and casing of hook, crane grab for unit and piece loads, carrier beams and clamps, load platforms and side dump buckets, electric lifting magnets, grabbing attachments for loose materials, crane attachments for handling liquid materials.

UNIT – IV

Gear:-Arresting gear, ratchet type arresting gear, roller ratchet, shoe brakes and its different types like electromagnetic, double shoe type, thruster operated, controller brakes, shoe brakes, thermal calculations of shoe brakes and life of linings, safety handles, load operated constant force and variable force brakes general theory of band brakes, its types and construction.

UNIT – V

Cranes:-Cranes with rotary pillar, cranes with a fixed post, jib cranes with trolley, cranes with luffing boom cantilever cranes, cage elevators safety devices of elevators belt and chain conveyors and their power calculations, vibrating and oscillating conveyors pneumatic and hydraulic conveyors, screw conveyors hoppers, gates and feeders. Introduction to AGV s as new material handling device, use of robot for material handling.

SECOND YEAR-Semester-VII
Course Content & Grade

Branch	Subject Title (Open Elective)	Subject Code	Contact Hours per Week	Total Credit
ME	RELIABILITY ENGINEERING	ME – 7031(A)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1-Students should be able to understand about what is Reliability.

CO2-Students should be able to understand how to allocate Reliability to each component

CO3-Students should be able to understand what is Maintainability.

CO4-Students should be able to understand about strength based reliability.

Unit -I

Reliability: Definition Probability Concept; Addition of Probabilities; Complimentary Events; Calculation of Reliability, Reliability analysis.

Unit -II

Failure Data Analysis:- Introduction, Mean Failure Rate, Mean Time to Failure (MTTF), Mean Time between Failures (MTBF), Graphical Plots, MTTF in terms of Failure Density, MTTF in Integral Form.

Unit - III

Conditional Probability:- Introduction, Hazard Rate as conditional probability, Principles of CBM, Pillars of condition monitoring, CBM implementation and benefits, visual monitoring, vibration monitoring, wear debris monitoring, corrosion monitoring, performance monitoring.

Unit - IV

General Maintenance & Management function:- Breakdown, emergency, corrective, predictive, Objectives and evolution of TPM, Effects and Criticality analysis (FMECA), applications and benefits, risk evaluation, risk priority.

Unit - V

Maintainability and Availability:- Introduction, Maintenance Planning & scheduling, Maintenance organization, Tools for better maintenance –preventive, shutdown and Scheduled maintenance.

FOURTH YEAR- Semester – VII
Course Content & Grade

Branch	Subject Title (Open Elective)	Subject Code	Contact Hours per Week	Total Credit
ME	TRIBOLOGY	ME – 7031(B)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1-Understand the wear theories, types of wear, mechanism, factors and selection of materials

CO2- To introduce students to the field of teratology.

CO3- To enhance students' awareness of tribological issues in the design of machine components, such as rolling element bearings, journal bearings, thrust bearings, seals, and braking systems.

UNIT - I

Tribological Aspects of Rolling Motion:-Introduction to tribological systems and their characteristic features; analysis and assessment of surface; topography; deterministic and stochastic tribo-models for asperity contacts; techniques of surface examination; technological properties of surfaces. Quantitative laws of sliding friction, causes of friction, adhesion theory, laws of rolling friction, measurement of friction

UNIT - II

Wear:-Introduction, mechanism of wear, types of wear, quantitative laws of wear, measurement of wear, wears resistance materials

UNIT - III

Lubricants:-Introduction, dry friction, boundary lubrication, hydrodynamic, hydrostatic and elasto-hydrodynamic lubrication, functions of lubricants, types and properties, lubricant additives. Principles, application to rolling contact bearings, cams, Gears

UNIT - IV

Bearing Design Consideration & Characteristics:-Geometry and pressure equation of journal bearing, hydrostatic bearings, thrust bearings, porous bearings and hydrodynamic gas bearings. Journal bearings with specialized applications. General requirements and different types of bearing materials.

UNIT - V

Surface Interactions:- Elastic & Plastic deformation of surfaces. Contact of Solids, Contact of Ideally Smooth Surfaces. Distribution of Pressure over elastic contact of two curvilinear bodies. Formulae for calculation of contact area. Physico-Mechanical properties of surface layers, Characteristics of Surface Geometry. Classes of surface roughness. Contact of rough surfaces. Interaction of surface peaks. Real and contour area of contact.

FOURTH YEAR-Semester-VII
Course Content & Grade

Branch	Subject Title (Open Elective)	Subject Code	Contact Hours per Week	Total Credit
ME	MECHANICAL VIBRATION	ME – 7031(C)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1-Ability enhancement in analyzing the machine vibrations in various degree of freedom systems.

CO2-Ability enhancement in determining the various causes of machine vibrations and noise and in applying the perfect compensatory system to control them.

CO3-Ability enhancement in practically using the different vibrations.

UNIT - I

Basic Concepts of Vibration:-Vibration and oscillation, causes and effects of vibrations, Vibration parameters – spring, mass, damper, Damper models, Motion – periodic, non periodic, harmonic, non-harmonic, Degree of freedom, static equilibrium position, Vibration classification, Steps involved in vibration analysis. Free Undamped Single Degree of Freedom Vibration System : Longitudinal, transverse, tensioned system, Methods for formulation of differential equations by Newton, Energy, Lagrangian (Rayleigh's Method), Effect of springs mass and shaft inertia on natural frequency, Effect of flexible bearing on natural frequency.

UNIT - II

Free Damped Single Degree of Freedom Vibration System:-Viscous damped system – under damped, critically damped, over damped; Logarithmic decrement; Coulomb's damping; Combined viscous and coulomb's damping. Equivalent Single Degree of Freedom Vibration System: Conversion of multi- springs, multi masses, multi – dampers into a single spring and damper with linear or rotational coordinate system

UNIT - III

Free Undamped Multi Degree of Freedom Vibration System:-Eigen values and Eigen vectors for linear system and tensional two degree of freedom; Holzer method for linear and tensional unbranched system; Two rotors, Three rotors and geared system; Dunkerly and Rayleigh method for transverse vibratory system Forced Single Degree of Freedom Vibratory System: Analysis of linear and tensional systems subjected to harmonic force excitation and harmonic motion excitation (excluding elastic damper)

UNIT- IV

Vibration Measuring Instruments:-Principle of seismic instruments, vibrometer, accelerometer-undamped, damped. Vibration Isolation: Force isolation, motion isolation, isolators. . Rotor Dynamics: Critical speed of single rotor, undamped and damped CAM Dynamics: Cam Dynamics: Mathematical Model, Differential Equation, Response Follower Jump Phenomenon

UNIT - V

Balancing:-Static and dynamic balancing of multi rotor system, balancing of reciprocating masses in – line engines, V – engines (excluding radial engines)

FOURTH YEAR-Semester-VII
Course Content & Grade

Branch	Subject Title (Departmental Elective Lab)	Subject Code	Contact Hours per Week	Total Credit
ME	AUTOMOBILE ENGINEERING	ME – 7041(A)	0L-0T-2P	2

Course Outcomes: After studying this course, students will be able to,

CO1- Understand the Construction, working and other details about Internal Combustion Engines used in automobiles.

CO2- Identify Construction, working, preventive maintenance, trouble shooting and diagnosis of various Automobile Systems.

CO3- Understand importance and features of different systems like axle, differential, brakes, steering, suspension, and balancing etc.

CO4- Identify Modern technology and safety measures used in Automotive Vehicles.

Suggested List of Laboratory Practical (Expandable):

1.To study and prepare report on the constructional details, working principles and operation of the following automotive clutches: (a) Coil –Spring clutch, (b) Diaphragm spring clutch, (c) Double disk clutch

2. To study and prepare report on the constructional details, working principles and operation of the following automotive transmission systems: (a) Synchromesh – four speed rang, (b) Transaxle with dual speed range, (c)Four wheel drive and transfer case, (d) Steering column and floor shift- lever

3. To study and prepare report on the constructional details, working principles and operation of the following automotive tires& wheel: (a) Various types of bias and radial plies tires, (b) Various types of wheels

4. To study and prepare report on the constructional details, working principles and operation of the following automotive steering systems: (a) Manual steering system, e.g. pitman arm steering, rack and pinion steering

(b) Power steering system, e.g. rack & pinion power steering systems

© Steering wheels & column, e.g. tilt and telescopic steering wheels, collapsible steering columns

5. To study and prepare report on the constructional details, working principles and operation of the following automotive brake systems: (a) Hydraulic & pneumatic brake system, (b) Drum brake system, (c) Disk brake system

(d) Antilock brake system

6. To study and prepare report on the constructional details, working principles and operation of the following automotive suspension systems: (a) Front suspension system, (b) Rear suspension system

R.K.D.F. UNIVERSITY, BHOPAL

B.E. (Mechanical Engineering)

FOURTH YEAR-Semester-VII

Course Content & Grade

7. To study and prepare report on the constructional details, working principles and operation of the following automotive drive lines and differentials: (a) Rear wheel drive line, (b) Front wheel drive line, (c) Differential, drive axel and four wheel drive line.

8. To study and prepare report on the constructional details, working principles and operation of the automotive emission / pollution control systems.

9. To study and prepare report on the constructional details, working principles and operation of the following automotive fuel supply systems: (a) Carburetor, (b) Diesel fuel injection systems, (c) Gasoline fuel injection systems

10. To study and prepare report on the constructional details, working principles and operation of the following automotive engine systems and sub systems: (a) Multi cylinder: diesel and petrol engine, (b) Engine cooling and lubricating systems, (c) Engine starting systems, (d) Contact point and electronic ignition

Course Content & Grade

Branch	Subject Title (Departmental Elective Lab)	Subject Code	Contact Hours per Week	Total Credit
ME	MECHANICAL SYSTEM DESIGN LAB	ME – 7041(B)	0L-0T-2P	2

Course Outcomes: After studying this course, students will be able to,

CO1- Apply knowledge of different types of machine parts and its attachments.

CO2- Apply applications of computer programming of different linkage and its Factor of Safety.

CO3- Understand different creep of creep and fatigue principles in machine parts.

CO4- Understand different types of brakes and clutches in practical applications.

Suggested List of Laboratory Practical's (Expandable)-

1. Study and determine the length of flat belt drive and rope drive.
2. Study different types of gear drive.
3. Study of different types of I.C. Engine components.
4. Study of Bush Pin type flexible coupling and Hooks Joints.
5. Study of thick and thin cylinder for Hoop and Longitudinal stress.
6. Study of different types of optimization Techniques in mechanical system design.

Course Content & Grade

Branch	Subject Title (Departmental Elective Lab)	Subject Code	Contact Hours per Week	Total Credit
ME	MATERIAL HANDLING EQUIPMENT LAB	ME – 7041(C)	0L-0T-2P	2

Course Outcomes: After studying this course, students will be able to,

CO1- Apply different types of material handling equipment in industry.

CO2- Understand different types of material handling conveyers and Host in factory.

CO3- Apply different types Hooks and cranes for small and heavy load in industry.

CO4- Apply different types of AGV in different types of industry.

Suggested List of Laboratory Practical (Expandable):

1. Study of different types of hydraulic and pneumatic conveyors.
2. Study of different types Chain and rope sheaves and sprockets.
3. Study of different types of Cranes and lifting machines in industry.
4. Study of different types of gears and clutches in machinery.
5. Study of different pneumatic and hydraulic conveyors.

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
FOURTH YEAR-Semester-VII
Course Content & Grade

Branch	Subject Title (Open Elective Lab)	Subject Code	Contact Hours per Week	Total Credit
ME	RELIABILITY ENGINEERING LAB	ME – 7051(A)	0L-0T-2P	2

Course Outcomes: After studying this course, students will be able to,

CO1-Students should be able to understand Addition of Probabilities.

CO2-Students should be able to understand Mean Time to Failure (MTTF).

CO3-Students should be able to understand Hazard Rate as conditional probability.

CO4-Students should be able to understand Effects and Criticality analysis.

Suggested List of Laboratory Practical (Expandable):

1. Study of reliability availability an Maintainability.
2. Study of Mean Time to Failure (MTTF) analysis with help of graph.
3. Study of visual monitoring system.
4. Study of different types of breakdown system in industry.
5. Study of different types of maintenance system in different types of machines,

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
FOURTH YEAR-Semester-VII
Course Content & Grade

Branch	Subject Title (Open Elective Lab)	Subject Code	Contact Hours per Week	Total Credit
ME	TRIBOLOGY LAB	ME – 7051(B)	0L-0T-2P	2

Course Outcomes: After studying this course, students will be able to,

CO1-Understand the tribological systems and their characteristic features.

CO2- To Understand mechanism of wear.

CO3- To Understand the Lubrication System.

CO4-To Understand Bearing Design Consideration & Characteristics.

Suggested List of Laboratory Practical (Expandable):

1. To study Tribological Rolling Motion in machinery.
2. To study Wear Mechanism in different industry.
3. To study of different types of Lubrication system in machinery.
4. To study of Bearing Design Consideration & its Characteristics.
5. Characteristics of Surface Texture Geometry in different types of surfaces.

R.K.D.F. UNIVERSITY, BHOPAL B.E. (Mechanical Engineering) FOURTH YEAR-Semester-VII **Course Content & Grade**

Branch	Subject Title (Open Elective Lab)	Subject Code	Contact Hours per Week	Total Credit
ME	MECHANICAL VIBRATION LAB	ME – 7051(C)	0L-0T-2P	2

Course Outcomes: After studying this course, students will be able to,

CO1- Apply knowledge of different types Linkage mechanisms in kinematic chain.

CO2- Apply applications of Governors and Gyroscope in different machinery.

CO3- Understand different types of sliding and rolling element bearing.

CO4- Understand the principle of Critical speed of shaft in single and multi rotor system.

Suggested List of Laboratory Practical (Expandable):

- 1 Determination of natural frequency of a spring mass system.
2. Determination of natural frequency logarithmic decrement, damping ratio and damping Co-efficient in a single degree of freedom vibrating systems (longitudinal and tensional).
3. Determination of critical speed of rotating shaft.
4. Study of Balancing of rotating masses.
5. Determination of fringe constant of Photo-elastic material using Circular disk subjected diametric compression, Pure bending specimen (four point bending)
6. Determination of equilibrium speed, sensitiveness, power and effort of Porter/Hartnell Governor.
7. Determination of pressure distribution in Journal bearing.
8. Designing and sketching of components contained in the syllabus

R.K.D.F. UNIVERSITY, BHOPAL B.E. (Mechanical Engineering) FOURTH YEAR-Semester-VII **Course Content & Grade**

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	MAJOR PROJECT-I	ME - 7061	0L-0T-4P	4

Course Outcomes: After studying this course, students will be able to,

CO1- Enable the Students to undertake short research projects in a team under the direction of members of the faculty

CO2-To impart skills in preparing detailed report describing the project and results.

CO3- To enable the students to undertake fabrication work of new experimental set up/devices or develop software packages

CO4-To effectively communicate by making an oral presentation before an evaluation committee

Contents (Theory)

Students shall be encouraged to form groups (Maximum 5) to do a Minor Project on technical topic of concern branch. The student should prepare a working system or some design or understanding of a

complex system (on minor level) that he has selected for his/her minor project work using system analysis tools and submit the same in the form of a write-up i.e. detail project report. The student should maintain proper documentation of different stages of project such as concept evaluation, requirement specification, objectives, work plan, analysis, design, implementation and test plan wherever applicable. Each student is required to prepare a project report based on the above points and present the same at the final examination with a demonstration of their project.

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
FOURTH YEAR-Semester-VIII
Course Content & Grade

Branch	Subject Title	Subject Code	Contact Hours per Week	Total Credit
ME	REFRIGERATION & AIR CONDITIONING	ME - 8011	3L-1T-2P	6

Course Outcomes: After studying this course, students will be able to,

CO1-Students should be able to understand various refrigeration cycles and evaluate performance using Mollier charts and/ or refrigerant property tables

CO2-Students should be able to illustrate the fundamental principles and applications of refrigeration and air conditioning system

CO3-Students should be able to obtain cooling capacity and coefficient of performance by conducting test on vapor compression refrigeration systems

CO4-Students should be able to present the properties, applications and environmental issues of different refrigerants

UNIT-I

Introduction: Principles and methods of refrigeration, freezing; mixture cooling by gas reversible expansion, throttling, evaporation, Joule Thomson effect and reverse Carnot cycle; unit of refrigeration, coefficient of performance, vortex tube & thermoelectric refrigeration, adiabatic demagnetization; air refrigeration cycles- Joule's cycle Boot-strap cycle, reduced ambient cycle and regenerative cooling cycles.

UNIT-II

Vapour compression system: Vapor compression cycle, p-h and t-s diagrams, deviations from theoretical cycle, sub-cooling and super heating, effects of condenser and evaporator pressure on cop; multi-pressure system: removal of flash gas, multiple expansion & compression with flash inter cooling; low temperature refrigeration: production of low temperatures, cascade system, dry ice, production of dry ice, air liquefaction system,.

UNIT-III

- (a) **Vapor absorption system:** Theoretical and practical systems such as aqua-ammonia, electrolux & other systems;
- (b) **Steam jet refrigeration:** Principles and working, simple cycle of operation, description and working of simple system,
- (c) **refrigerants:** nomenclature & classification, desirable properties, common refrigeration, comparative study, leak detection methods, environment friendly refrigerants and refrigerant mixtures, brine and its properties

UNIT-IV

Psychometric: Calculation of psychometric properties of air by table and charts; psychrometric processes: sensible heating and cooling, evaporative cooling, cooling and dehumidification, heating and humidification, mixing of air stream, sensible heat factor; principle of air conditioning, requirements of comfort air conditioning, ventilation standards, infiltrated air load, fresh air load human comfort, effective temperature & chart, heat production & regulation of human body,

UNIT-V

Air conditioning loads: calculation of summer & winter air conditioning load, bypass factor of coil, calculation of supply air rate & its condition, room sensible heat factor, grand sensible heat factor, effective sensible heat factor, dehumidified air quantity. Problems on cooling load calculation. Air distribution and ventilation systems.

2. Sapali SN; Refrigeration and Air Conditioning; PHI
3. Ananthanarayan; Basic Refrigeration and Air conditioning; TMH
4. Manohar Prasad; Refrigeration and Air Conditioning; New Age Pub
5. Ameen; Refrigeration and Air Conditioning; PHI
6. Pita ; Air conditioning Principles and systems: an energy approach; PHI
7. Stoecker W.F, Jones J; Refrigeration and Air conditioning; McGH, Singapore

Suggested List of Laboratory Practical (Expandable):

1. Study & Performance of basic vapour compression Refrigeration Cycle
2. To find COP of water cooler
3. To study and perform experiment on vapour absorption apparatus.
4. To find the performance parameter of cooling tower.
5. To study various components in room air conditioner.
6. To find performance of a refrigeration test rig system by using different expansion devices.
7. To study different control devices of a refrigeration system.
8. To study various compressor.
9. To find the performance parameters of Ice Plant.
10. Perform the experiment & calculate various Performance parameters on a blower apparatus.

R.K.D.F. UNIVERSITY, BHOPAL
B.E. (Mechanical Engineering)
FOURTH YEAR-Semester-VIII
Course Content & Grade

Branch	Subject Title (Departmental Elective-IV)	Subject Code	Contact Hours per Week	Total Credit
ME	I.E. & OPERATION RESEARCH	ME – 8021 (A)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1-Students will be proficient to recognize the importance and value of Operations Research and mathematical modeling in solving practical problems in industry by Linear programming problems

CO2-Planning and controlling of production system and use of modern forecasting and management techniques for different types of industries

CO3-Students will be able to understand queuing & sequencing models and apply them to real-life problems

CO4-Students will be capable to understand the mathematical tools that are needed to formulate & solve transportation problems for optimization

Unit - I

Linear system and distribution models: Mathematical formulation of linear systems by LP, solution of LP for two variables only, special cases of transportation and assignment and its solution, Vogel's forward looking penalty method, cell evaluation degeneracy, use of SW Lindo, Tora, Excell.

Unit - II

Supply chain (SCM): Definition, importance, expenditure and opportunities in SCM; integration of inbound, outbound logistics and manufacturing to SCM, flow of material money and information, difficulties in SCM due to local v/s system wide (global) optimization and uncertainties in demand and transportation; Bull-whip effect; customer value; IT, info-sharing and strategic partnerships; plant and warehouse-network configuration; supply contracts and revenue sharing; outsourcing; transportation, cross docking and distribution, forecasting models in SCM; coordination and leadership issues; change of purchasing role and vendor rating, variability from multiple suppliers.

Unit - III

Inventory models: Necessity of inventory in process and safety stock, problem of excess inventory and cycle time (=WIP/ Throughput), JIT/ lean mfg; basic EOQ/ EPQ models for constant review Q-system(S,s); periodic review, base stock P-system; service level, lead time variance and safety stock;; ABC, VED and other analysis based on shelf life, movement, size, MRP technique and calculations, lot sizing in MRP, linking MRP with JIT; evolution of MRP to ERP to SCM and e-business.

Unit - IV

(a) **Waiting Line Models** Introduction, Input process, service mechanism, Queue discipline, single server (M/M/1) average length and times by Little's formula, optimum service rate; basic multiple server models (M/M/s)

(b) **Competitive strategy:** concept and terminology, assumptions, pure and mixed strategies, zero sum games, saddle point, dominance, graphical, algebraic and LP methods for solving game theory problems.

Unit - V

(a) **Decision analysis:** decision under certainty, risk probability and uncertainty; Hurwicz criteria; AHP- assigning weight and consistency test of AHP

(b) **Meta-heuristics** Definition of heuristic and meta-heuristic algorithms; introduction to Tabu search, Simulated Annealing and Genetic algorithms and solution of traveling salesman and non linear optimization problems.

FOURTH YEAR-Semester-VIII
Course Content & Grade

Branch	Subject Title (Departmental Elective)	Subject Code	Contact Hours per Week	Total Credit
ME	SOLAR ENERGY UTILISATION	ME – 8021(B)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1-Gain an understanding of the available solar energy and the current solar energy conversion and utilization processes.

CO2-Have a working knowledge of semiconductor physics, optical systems, photovoltaic engineering, load matching, and storage and grid connections.

CO3-Be able to comprehend the challenges in sustainable energy processes, perform cost analysis, design

photovoltaic systems for different applications meeting residential and industrial needs, predict

and test performance,

CO4-Understand the manufacturing processes involved, environmental challenges that need

to be solved, economic aspects, and future potentials.

UNIT-I

Energy resources and their utilization: Indian and global energy sources, Energy exploited, Energy planning, Energy Parameters (energy intensity, energy-GDP elasticity), Introduction to various sources of energy, Solar thermal, Photovoltaic, Water power, Wind energy, Biomass, Ocean thermal, Tidal and wave energy, Geothermal energy, Hydrogen energy systems, Fuel cells, Decentralized and dispersed generation.

UNIT-II

Solar radiations: Extra terrestrial radiation, Spectral distribution, Solar constant, Solar radiations on earth, Measurement of solar radiations, Solar radiation geometry, Flux on a plane surface, Latitude, Declination angle, Surface azimuth angle, Hour angle, Zenith angle, Solar altitude angle expression for angle between incident beam and the normal to a plane surface (no derivation), Local apparent time, Apparent motion of sun, Day length, Solar radiation data for India.

UNIT-III

Solar energy: Radiation, flat plate and concentrating collectors, fluid flow and heat transfer analysis, estimation of solar radiation, Active systems, solar pond, passive space conditioning, power generation, photovoltaic's. Principles and applications of wave energy, tidal energy, biomass energy, OTEC and Geothermal energy. MHD Engineering. Fuel Cells. Wind Energy potentials.

UNIT-IV

Solar Photovoltaic: Principle of photovoltaic conversion of solar energy, types of solar cells and fabrication. Photovoltaic applications: battery charger, domestic lighting, street lighting, water pumping, power generation schemes.

UNIT-V

Other Non- Conventional energy sources: Geothermal energy – Introduction, Types of geothermal resources, Methods of Harnessing. Energy from oceans – wave energy, energy conversion devices, tidal energy- Types of tidal power plants, ocean thermal energy – Introduction, open & closed systems.

Course Content & Grade

Branch	Subject Title (Departmental Elective)	Subject Code	Contact Hours per Week	Total Credit
ME	SIMULATION & MODELLING-II	ME – 8021(C)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1- The student will be able to appreciate the utility of the tools like ANSYS or FLUENT in solving real time problems and day to day problems

CO2- Use of these tools for any engineering and real time applications.

CO3- Acquire knowledge on utilizing these tools for a better project in their curriculum as well as they will be prepared to handle industry problems with confidence when it matters to use these tools in their employment.

Unit - I

Introduction to Modeling and Simulation: Modeling and simulation methodology, system modeling, concept of simulation; gaming; static, continuous and discrete event simulation.

Unit - II

Basic Concept of Probability: Generation and characteristics of random variables, continuous and discrete variables and their distributions; mapping uniform random variables to other variable distributions; linear, nonlinear and stochastic models

Unit - III

Introduction to Queuing Theory: Characteristics of queuing system, Poisson's formula, birth death system, equilibrium of queuing system, analysis of M/M/1 queues. Introduction to multiple server Queue models M/M/c Application of queuing theory in manufacturing and computer system

Unit - IV

System Dynamics Modeling: Identification of problem situation, preparation of causal loop diagrams and flow diagrams, equation writing, level and rate relationship, Simulation of system dynamics models.

Unit - V

Verification and Validation: Design of simulation experiments, validation of experimental models, testing and analysis. Simulation languages comparison and selection, study of simulation software Arena, Pro-model, SIMULA, DYNAMO, STELLA, POWERSIM.

ME	ROBOTICS	ME – 8031 (A)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1- Apply the basic concepts of Robots

CO2- Apply and evaluate the concepts of Kinematics of Robotics.

CO3- Apply the Motions, velocities and dynamic analysis of force.

CO4- Apply and evaluate Motion planning

Unit – I

Introduction: Automation and Robotics, CAD/CAM and Robotics - An over view of Robotics – present and future applications - classification by coordinate system and control system. Need an importance, basic concepts, structure and classification of industrial robots

Unit – III

Components of the Industrial Robotics: Function line diagram representation of robot arms, common types of arms. Components, Architecture, number of degrees of freedom - Requirements and challenges of end effectors, determination of the end effectors, comparison of Electric, Hydraulic and Pneumatic types of locomotion devices.

Unit – IV

Robot programming: languages and software packages, Piezoelectric sensors , linear position and displacement sensing, revolvers, encoders, velocity measurement, proximity, tactile, compliance and range sensing. Image processing and object recognition.

Unit – II

Robot Application in Manufacturing: Material Transfer - Material handling, loading and unloading- Processing - spot and continuous arc welding & spray painting - Assembly and Inspection.

Unit – V

Safety and Economy of Robots: Work cycle time analysis, economics and effectiveness of robots, safety systems and devices, concepts of testing methods and acceptance rule for industrial robots.

FOURTH YEAR-Semester-VIII
Course Content & Grade

Branch	Subject Title (Open Elective)	Subject Code	Contact Hours per Week	Total Credit
ME	QUALITY MANAGEMENT & CONTROL	ME – 8031(B)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1- To realize the importance of significance of quality

CO2- Manage quality improvement teams

CO3- Identify requirements of quality improvement programs

UNIT - I

Introduction: Basic concepts, definitions and history of quality control. Quality function and concept of quality cycle. Quality policy and objectives. Economics of quality and measurement of the cost of quality. Quality considerations in design. Process control: Machine and process capability analysis. Use of control charts and process engineering techniques for implementing the quality plan. Acceptance Sampling: single, double and multiple sampling, lot quality protection, features and types of acceptance sampling tables.

UNIT-II

Management duration and Control: Importance and options to accelerate project completion; time cost tradeoff; fixed variable and total costs; use of floats and cost optimization; project performance measures; project monitoring info and reports; project control process; Gant chart and control chart cost-schedule S-graph; planned cost of work schedule (PV), budgeted/ earned cost of work (EV) and actual cost of work completed (AC).

UNIT-III

Quality Organization, Culture and Leadership: projects within functional organization; dedicated project/ task-force teams; staff, matrix and network organization;; Organization culture; ten characteristics; cultural dimensions supportive to projects; social network and management by wandering around (MBWA)); five stage team development model; shared vision; conflicts; rewards; rejuvenating project teams; project stakeholders; concept of project partnering.

UNIT-IV

Strategic Planning and Project Appraisal: Capital allocation key criteria; Porters competitive strategy model; BCG matrix; Strategic Position Action Evaluation (SPACE); time value of money; cash flows; payback period; IRR; cost of capital; NPV; social cost benefit analysis; UNIDO approach; project risks and financing.

UNIT-V

Defect Diagnosis and Prevention : Basic causes of failure, curve/control of failure. **MTBF.** Maintainability, Condition monitoring and dignostic techniques. different traits of a manager and leader; managing project teams, choosing appropriate project organization.

ME	RAPID PRODUCT DEVELOPMENT	ME – 8031(C)	3L-1T-0P	4

Course Outcomes: After studying this course, students will be able to,

CO1: Describe product development, conceptual design and classify rapid prototyping systems; explain stereo lithography process and applications.

CO2: Explain Geometric modeling, Types of Geometric models and Solid Models.

CO3: Demonstrate Virtual augmented reality.

CO4: Discuss NC, CNC processes; point out the application of RP system in medical field define virtual prototyping and identify simulation components.

UNIT - I

Introduction: Influence of Innovations on Product Development, Impact on economy, export competitiveness, design as a strategy to win international market and Innovation process.

UNIT - II

Virtual Prototyping and Testing: Geometric modeling, Types of Geometric models and Solid Models Virtual augmented reality, Requirement of devices and technologies and applications Computer Aided Engineering.

UNIT -III

Physical Prototyping and Rapid Manufacturing Computer Numerical Control: Comparison between NC and conventional machines features of CNC Machine Tool and programming.

UNIT –IV

Rapid Tooling: Indirect rapid tooling process.

UNIT - V

Rapid Prototyping and Rapid Tooling: Methods, Stereo lithography, Fused-deposition modeling, Selective laser sintering, Laminated-object manufacturing, Ballistic particle manufacturing, Solid base

curing and Direct manufacturing and rapid tooling.
